

ACHILLES

1988 INFLATABLE BOATS

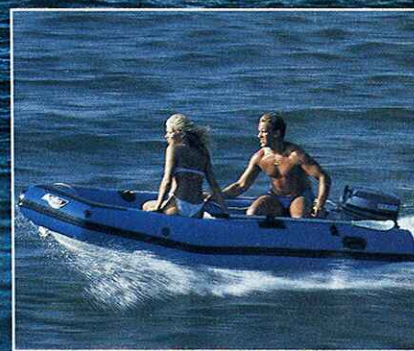

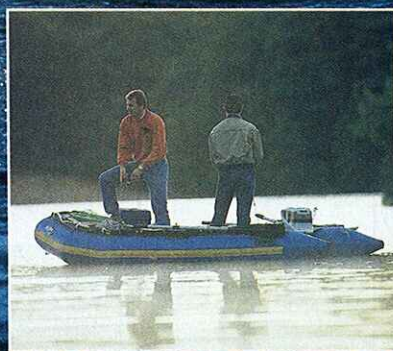

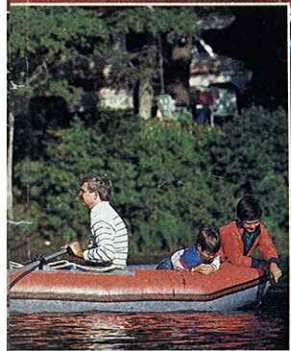

THERE'S MORE GREAT BOATING IN EVERY ACHILLES

Inflatable boats make boating easier, Achilles inflatables make it better. An inflatable eliminates the expense and problems of owning, maintaining, storing and transporting a rigid hull boat. The design, features and durability of Achilles boats allow more in-the-water options no matter what your reason for owning a boat. With an Achilles, your practical dinghy is also a fun runabout; your roomy tender an exciting ski boat; your high-performance sportboat a functional fishing or dive boat.

Achilles boats add more fun and functions to your boating experience because they are the best built inflatables in the world. Serious boaters know this. People who really depend on an inflatable for safety, comfort and reliability choose Achilles because they know Achilles quality has been proven second to none. Other manufacturers have compromised quality in recent years in order to produce less expensive boats which will appeal to the growing number of casual boaters discovering the advantages of inflatables. Achilles, however, has never compromised on its commitment to quality and safety which has made it a favorite among sailors, divers, and others who really know inflatables.

Safety, durability, performance—the things that Achilles is famous for are the same things anyone interested in boating should consider when choosing an inflatable. Because you don't want to compromise any of them out on the water.

MORE SAFETY

Safety should be the first concern of any boater, whether you're out on the water every day or once a year. You won't find a safer inflatable than Achilles. While other manufacturers look to find ways to cut back on features in order to produce a cheaper, mass appeal boat, Achilles continues to add to its impressive list of safety features. Although costly and time consuming, Achilles still reinforces seams inside and out and builds multiple air chambers into every boat. Larger buoyancy tubes insure a more stable boat. Safety handles, seats, oar-lock system, inflatable keels—every Achilles boat offers a range of features designed to make them safer and more comfortable. And unlike some other manufacturers, this is true for all Achilles boats, not just the most expensive models.

BETTER FABRIC

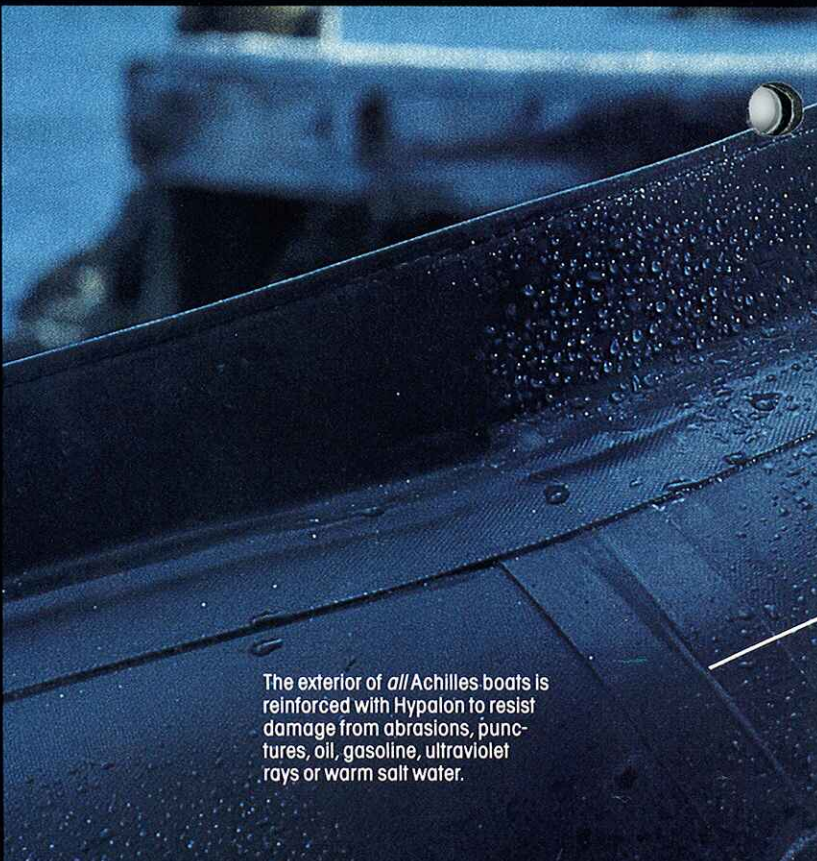

Achilles boats are made with Hypalon-reinforced fabric. Made by DuPont, Hypalon is the proven, single best agent for resisting damage to inflatable boats. And Achilles boats are the top-selling Hypalon inflatables. With all the claims made about various inflatable boat fabrics, it's important to remember that there are really only two basic types of fabrics among the most popular inflatable boats—Hypalon-based and PVC-based. More and more manufacturers are turning to PVC since it is a less expensive alternative. But Hypalon is proven better for resisting damage from abrasions, oil, gasoline, warm salt water or ultraviolet rays. This is why Achilles continues to use Hypalon in all its boats, and not just its most expensive models as another leading manufacturer does.

SUPERIOR PERFORMANCE

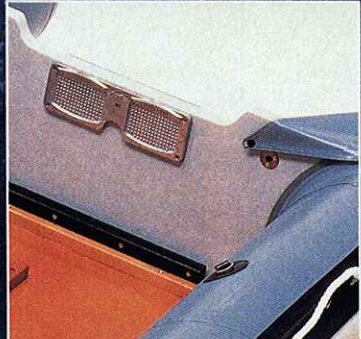

In the end, you need a boat that performs. Out on the water your boat must respond to your demands in order to make your boating experience as pleasurable or functional as possible. Achilles boats provide a level of performance far superior to what many expect from an inflatable. That's because every year Achilles continues to refine boat designs and add new features. The Achilles commitment to quality includes investing time and money into ongoing research. The result is a full line of inflatable boats with superior performance features to meet any need; sportboats that handle and maneuver superbly; utility boats able to carry heavy loads; dive boats with outstanding stability and room that still move quickly across the water; dinghies that carry people and gear easily and comfortably. All part of the Achilles family of quality inflatable boats.

THERE'S MORE QUALITY IN EVERY ACHILLES BOAT

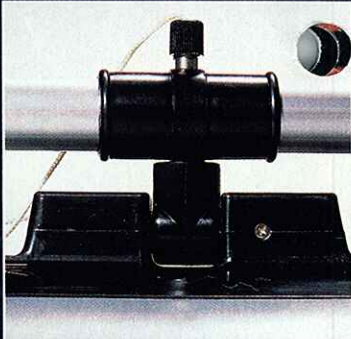

The more you know about inflatable boats, the more you will appreciate the commitment to quality at Achilles. It has always been our goal to produce the best inflatable boats in the world. Not the most marketable, not the cheapest, not the prettiest. Simply the best. We believe we have succeeded, and so do a lot of people who know and depend upon inflatable boats. The record of reliability and safety we have built backs us up. And we back up our boats with an outstanding warranty.

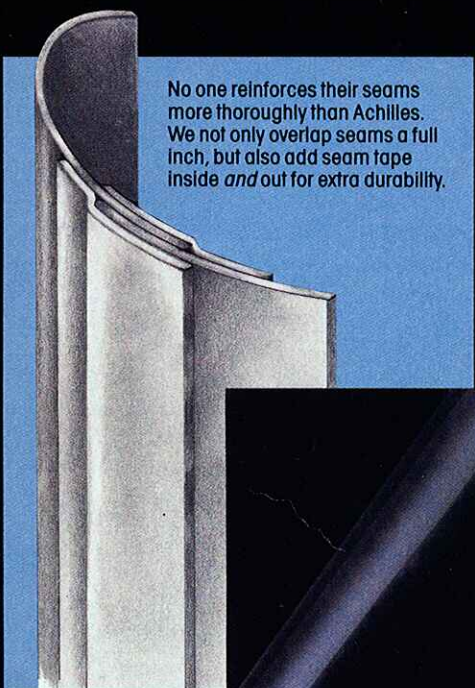

The exterior of *all* Achilles boats is reinforced with Hypalon to resist damage from abrasions, punctures, oil, gasoline, ultraviolet rays or warm salt water.

Fiberglass transoms with aluminum pads are found on most Achilles boats.

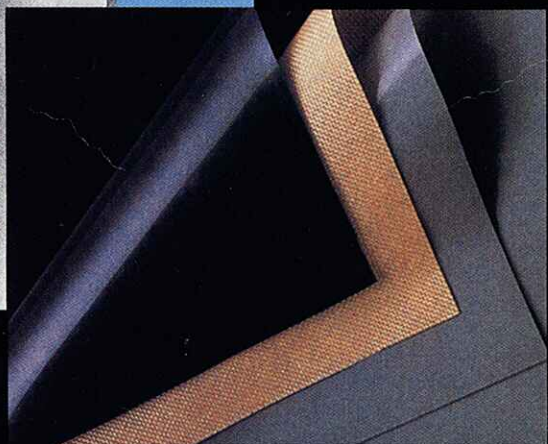

The most advanced oar system in the industry was designed by Achilles.

No one reinforces their seams more thoroughly than Achilles. We not only overlap seams a full inch, but also add seam tape inside *and* out for extra durability.

A tough nylon core, exterior layer of Hypalon and two interior coatings of Neoprene make Achilles fabric the toughest, most airtight in the industry.

THE BEST FABRIC MEANS MORE DURABILITY

The fabric is the single most important factor in an inflatable boat and no one makes a tougher, more durable fabric than Achilles. No one. Despite all the conflicting claims about fabric, there are really only two types of fabrics used on the top inflatables: Hypalon-reinforced and PVC-reinforced.

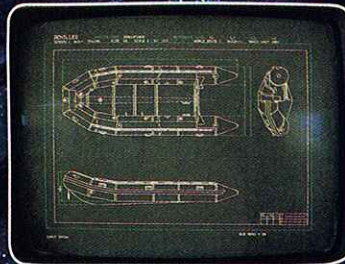

PVC (polyvinylchloride) is a plastomer or plastic-based product which, although used in inflatables for many years, has become more popular in recent years. It is used by several well known inflatable manufacturers in their boats and is a much less costly alternative to Hypalon.

Hypalon is an elastomer produced by DuPont which has been proven to be the more effective in resisting damage from abrasions, oil, gasoline or the weathering effects of the sun, ozone or warm salt water.

Seams are overlapped a full inch and taped inside and out for safety.

A rubbing strake around all our boats provides extra protection.

Extra air chambers mean extra safety and buoyancy.

Computer-aided design permits ongoing refinements and improvements.

FIVE YEAR WARRANTY ON FABRIC AND SEAMS

WE BACK OUR CLAIM TO HAVING THE BEST FABRIC AND CONSTRUCTION IN THE INDUSTRY WITH A STRONG WARRANTY COMMITMENT.

At Achilles we use Hypalon on all our boats *even though our parent company is one of the world's largest producers of PVC!* This is because we refuse to compromise quality for cost.

And we use Hypalon over a tough heavy-duty, nylon core for maximum strength and toughness. The inside of our fabric is coated with two layers of Neoprene because this elastomer is more airtight than Hypalon. This guarantees that our boats will remain fully inflated longer, even in extreme temperatures. Again this is a more costly, time consuming step taken to insure unsurpassed quality and safety.

THE BEST TECHNOLOGY MEANS A BETTER DESIGN

Despite the extra care we take in producing Achilles boats, our modern production facility and advanced technology permit us supe-

rior manufacturing efficiency. So Achilles inflatables are still competitively priced.

Our modern technology, such as a computer-aided design (CAD) system, also allows us to explore more design alternatives and incorporate them into our boats quickly. We never stop refining and improving our boats. Innovations such as our inflatable deep "V" keel, multiple air chambers, self-locking floorboards, fiberglass transoms and so on have all evolved from ongoing research and experimentation. This is why Achilles boats outperform other inflatables. Boaters are the driving force behind our designs, not marketing departments or factory capabilities.

THE BEST FEATURES MEAN MORE SAFETY AND COMFORT

Nobody puts more—or better—standard features on their boats than Achilles. Many of them, like our exclusive oar-lock system or

aluminum motor pads can be seen. Others, like our doubly reinforced seams or multiple air chambers, cannot. But it is attention to safety and detail inside and out that has helped us establish Achilles as the best built inflatable boats.

Our boats usually have at least one more air chamber than comparable competing boats. This is both a safety and a performance plus. Our seams are overlapped well beyond the industry standard and reinforced with seam tape outside *and* inside. Although inside seam tape is not used by most other manufacturers and cannot be seen, we know it makes a safer boat so we use it.

Our oars and seats are carefully designed to make rowing as easy as possible. Our transoms are made to last. Our extra bow rings, safety grip handles, and fuel tank fasteners are standard because they help make a better boat. When it comes to features you won't find a better equipped inflatable. In fact, you won't find a better inflatable, period.

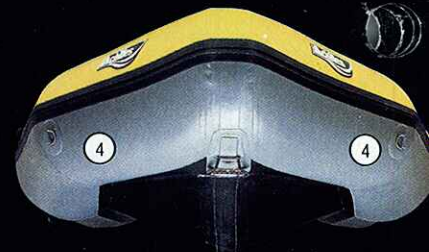

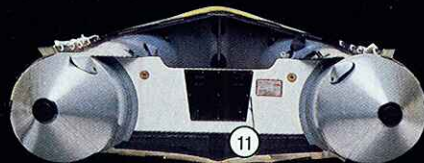

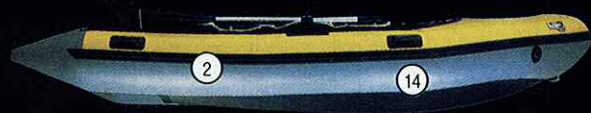

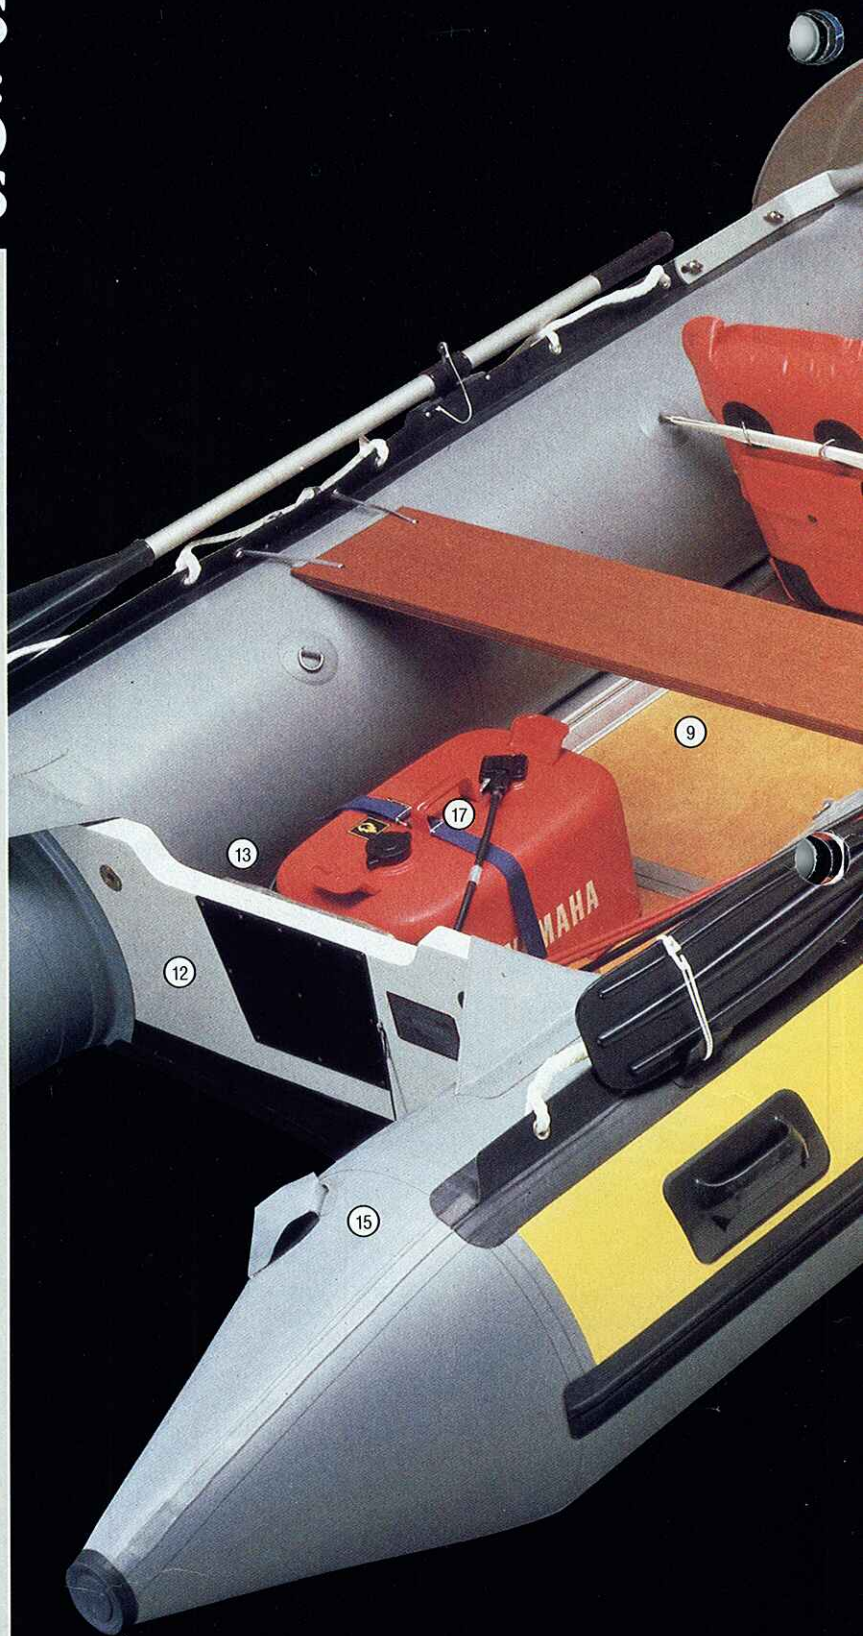

ACHILLES SPORTBOATS AND SPORT DINGHIES: MORE STANDARD FEATURES

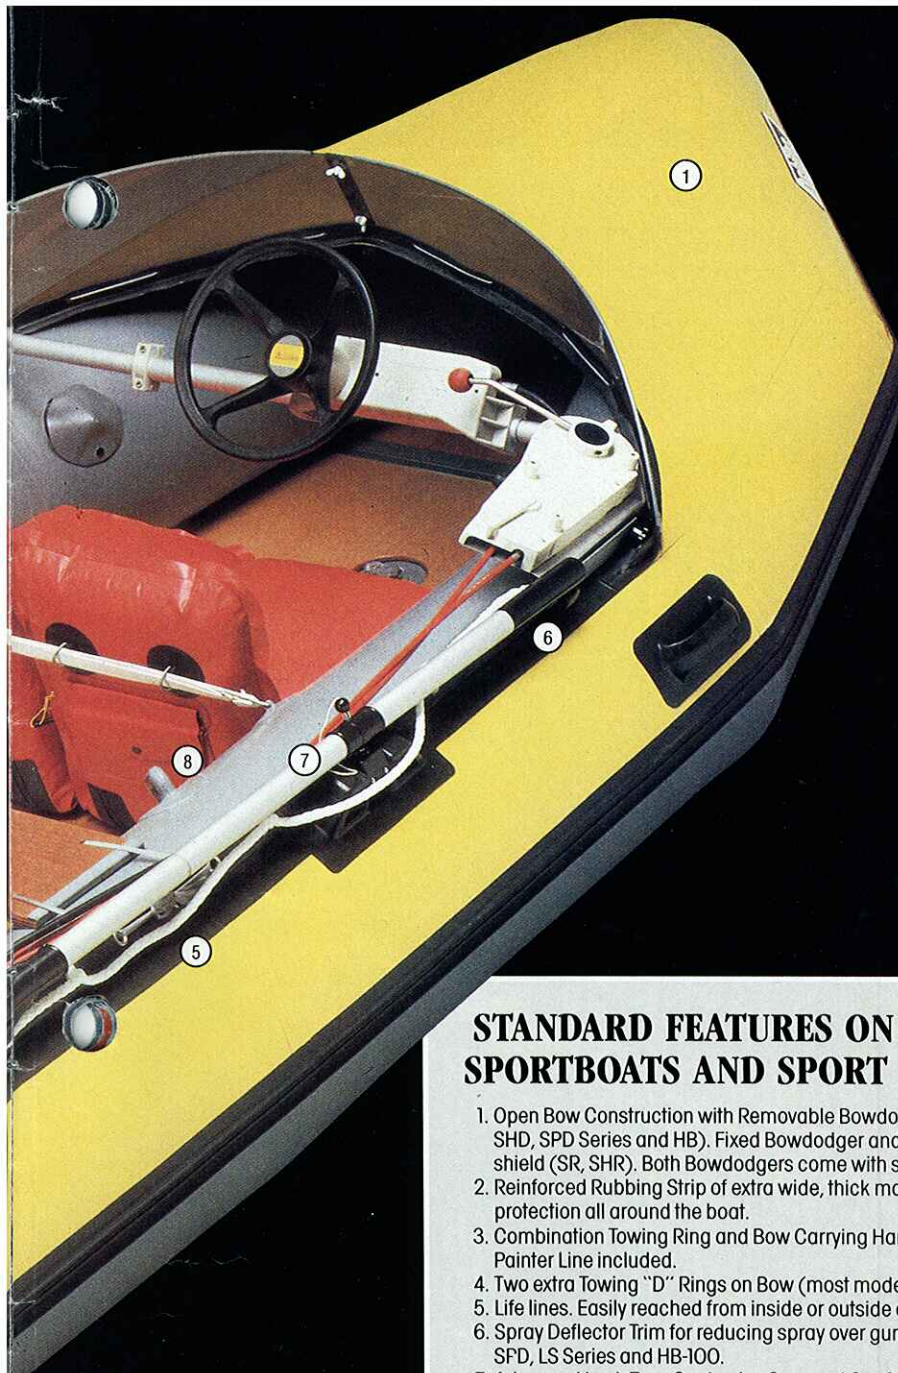

Manufacturing a quality boat means building in a range of great standard features. More standard features, in fact, than anybody else. So no matter which Achilles sportboat or sport dinghy you select, you know that in addition to a well-designed boat, you are also assured a well-equipped boat. A boat that will deliver all the advantages of an inflatable without sacrificing any of the comfort or excitement you expect from a high performance sportboat.

From major Achilles innovations such as a simple, self-locking floor-board system and advanced fold-down, lock-in oar system, to important small features like fuel tank fasteners and aluminum transom pads, the commitment is to comfort, safety and convenience. It is also important to Achilles that the features fit the boat. So you won't find identical features on all boats, only the ones that best support the function of each particular boat. At Achilles, each model is designed individually to be the best that it can.

So whether you select an SE or SQ Sportboat for practicality, an SD for roominess, an SK for excitement, an SR for sportiness or an SH for toughness, you are sure of owning a versatile boat that can perform many functions well. The same holds true for all Achilles sport dinghies from the sporty SPD models to the more compact LS and LT lines. Every Achilles inflatable is loaded with great features that make it a complete boat, ready for work or play.

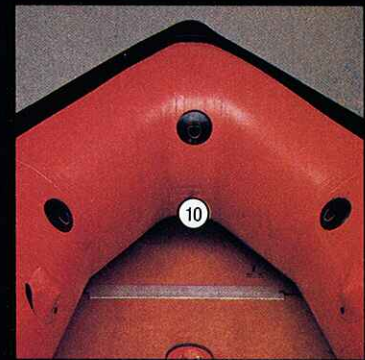

Compare features and you'll see the difference the Achilles commitment to quality makes.

STANDARD FEATURES ON ACHILLES SPORTBOATS AND SPORT DINGHIES

1. Open Bow Construction with Removable Bowdodger (SE, SD, SK, SHD, SPD Series and HB). Fixed Bowdodger and optional Windshield (SR, SHR). Both Bowdodgers come with support bar.
2. Reinforced Rubbing Strip of extra wide, thick molded rubber for protection all around the boat.
3. Combination Towing Ring and Bow Carrying Handle of solid metal. Painter Line included.
4. Two extra Towing "D" Rings on Bow (most models).
5. Life lines. Easily reached from inside or outside of boat.
6. Spray Deflector Trim for reducing spray over gunwales. Except SPD, LS Series and HB-100.
7. Advanced Lock-Type Oar Locks, Oars and Oar Stoppers. (except SR/SD/SK-156).
8. Helmsman's Grip Handle for driving at high speed. (except LS Series)
9. Heavy-Duty Marine Plywood Sectional Floorboards with high-gloss varnish (on all sportboats and sport dinghies except SU, SH, SK, GT and HB Series. SU, SH, SK and GT Series have aluminum floorboards, available on SR and SD Series (except SR-110). SK, SH and SU Series have only aluminum floorboards. HB Series has a solid fiberglass reinforced floor.
10. Multi-purpose interior Bow Rings for securing holdalls and other items (except SPD, LS and HB Series).
11. Bilge Drain. Self-bailing drain with rubber diaphragm check valve.
12. Solid Fiberglass-Reinforced Transom for strong support of high performance outboards (except some SPD and LS Series).
13. Aluminum Pad to protect transom and prevent engine "ride-up."
14. Lifting Handles for easy carrying. (except LS Series).
15. Extra Large Check Valves for quicker inflation and deflation. One-way airtight valve for inflation, capped for double safety. Cap and valve unscrewed together for fast deflation. (SU and SH Series have recessed valves.)
16. High Volume Foot Pump.
17. Fuel Tank Fastener to solidly secure tanks and prevent any movement (except SPD, LS and Aluminum Floorboard model). Optional fuel tank pad available.
 - Carrying Bag for easy stowing and storage (except SU Series).
 - Repair Kit.

SE AND SQ SPORTBOATS: MORE ALL-ROUND USES

SE-12
Steering system shown is optional accessory.

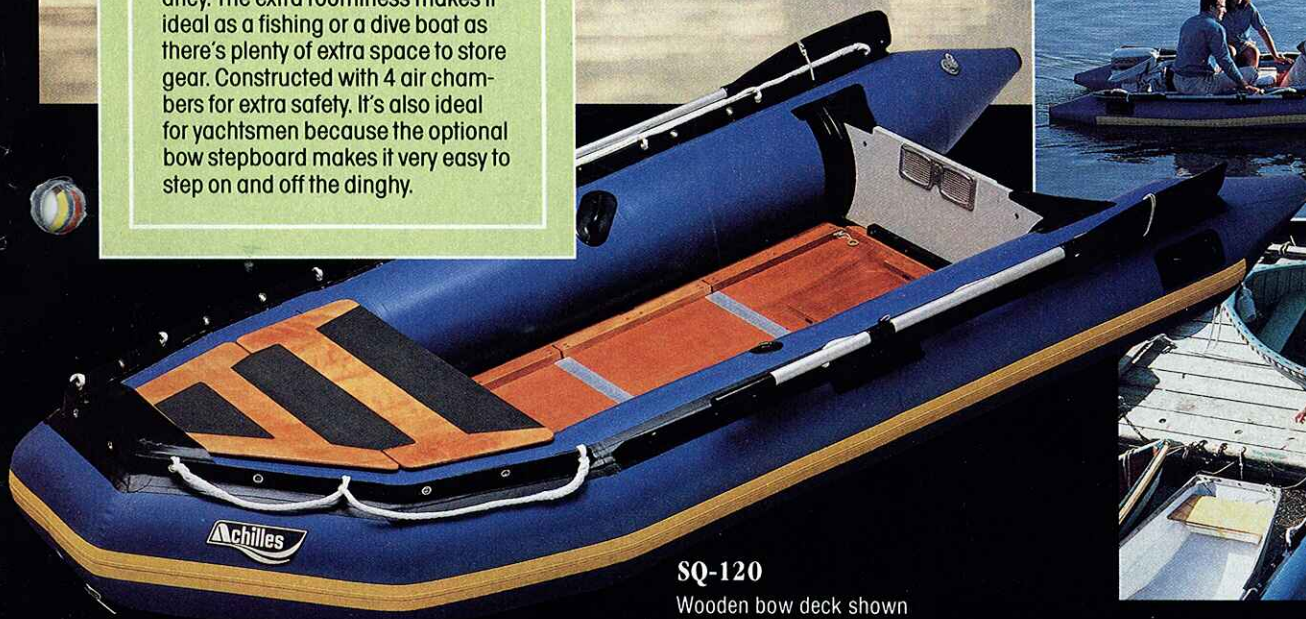

SE Sportboats make great all-around family fun boats and fishing boats as well as outstanding economical tenders for larger boats. Their roominess and stability allow them to carry heavy loads of passengers and gear while their sportboat design provides high speed performance and superior maneuverability. Their unique bow step guard allows you to step on the bow tube when boarding, unboarding or just out fishing. Another practical feature is Achilles' famous fold-down oar lock system.

These sportboats are truly versatile.

One of the most versatile inflatables afloat. Thanks to its newly squared bow design, it offers far more interior room and more buoyancy. The extra roominess makes it ideal as a fishing or a dive boat as there's plenty of extra space to store gear. Constructed with 4 air chambers for extra safety. It's also ideal for yachtsmen because the optional bow stepboard makes it very easy to step on and off the dinghy.

SD SPORTBOATS: MORE ROOM & MORE FUN

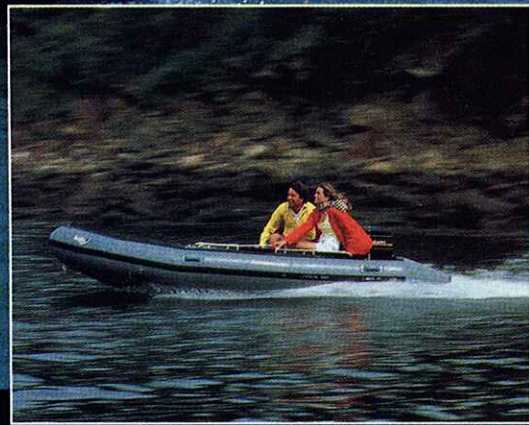

It's difficult to imagine any boating need that tough, roomy SD Sportboats can't handle. Their excellent oar system and optional seating accessories make them superb tenders. Their roominess, stability and durability make them rugged utility boats. And their superior performance make them exciting, planing sportboats.

SD boats are a favorite of divers and fishermen because they can carry a lot of gear and are extremely stable. But when the fishing or diving is over they still have a high performance funboat for waterskiing or other uses.

An SD Sportboat is a logical choice for the boater who wants a boat that can do a little bit of everything, and look good doing it.

SK SPORTBOATS: MORE EXCITEMENT

Roomy, rugged and ready for action! The greater the challenge the more you'll appreciate these sleek, high performance boats. From working to water skiing and everything in between, there's no better combination of muscle and looks on the water.

In addition to all the great standard features you'll find on any Achilles sportboat, the SK series offers the special advantages of self-locking aluminum floorboards. Their non-slip design lets you move about the boat easily. They are corrosion-resistant and will never be damaged by the sun, salt water or chemicals. Plus there is no painting or upkeep needed.

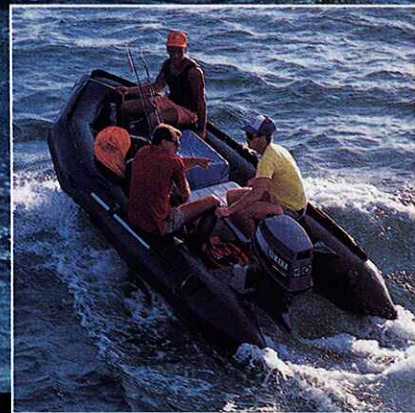

Perfect for divers and their gear, fishing or hunting expeditions, or just enjoying as much speed and excitement as you can handle!

SR SPORT BOATS: MORE SPORT

With fixed bowdodgers as standard equipment, SR Sportboats represent our sportiest models. These all-purpose boats afford you all the versatility of a tough, roomy inflatable without sacrificing any of the excitement of a high performance sportboat. Now available in a striking yellow and grey color combination as well as in red, SR boats will rise up on a plane quickly and easily using a smaller outboard than rigid hull boats of the same size. And once you're underway in an Achilles SR Sportboat, you'll love the easy handling and superb maneuverability these sporty models provide. A range of accessories including steering system and sport seats is available to outfit your SR boat to fit your exact needs. Water skiing, scuba diving and fishing are only some of the uses you'll find for SR Sportboats. These versatile boats also make superb yacht tenders, runabouts and all-around utility boats.

SR Sportboats not available in U.S. or Canada.

SH/SU HEAVY DUTY SPORT & WORK BOATS:

SH boats are made to take on any challenge. They can handle the rigors of rough seas or rough use. SH models are made with the same high performance design as our SD Series Sportboats but have an additional heavy-duty layer of 840 denier nylon throughout to double their strength. And these six ply boats deliver both sportboat maneuverability as well as workboat toughness. All SH boats have self-locking aluminum floorboards and fiberglass reinforced transoms.

Our SU workboats are made to withstand any industrial use while still providing the advantages of an inflatable boat. Achilles uses a special two-ply technique which bonds together two layers of heavy-duty base nylon fabric prior to the protective calendaring of Hypalon outside and Neoprene inside. This two-ply technique actually makes the core fabric of these boats stronger than a single base fabric of equal thickness. And a super wide tube diameter keeps these workboats stable even under the heaviest loads.

HB RIGID HULL BOATS: MORE PERFORMANCE

The best of both worlds! Achilles HB Boats combine the safety, stability and buoyancy of an inflatable with the performance of a deep "V" rigid hull boat. And in 1988, you have two great HB models to choose from, our popular 10-foot HB-100 and the brand new HB-90, 8-feet, 10-inches of compact performance and fun.

Even with their rigid hulls, HB boats are still easy to transport and store due to their lightweight and deflatable tubes.

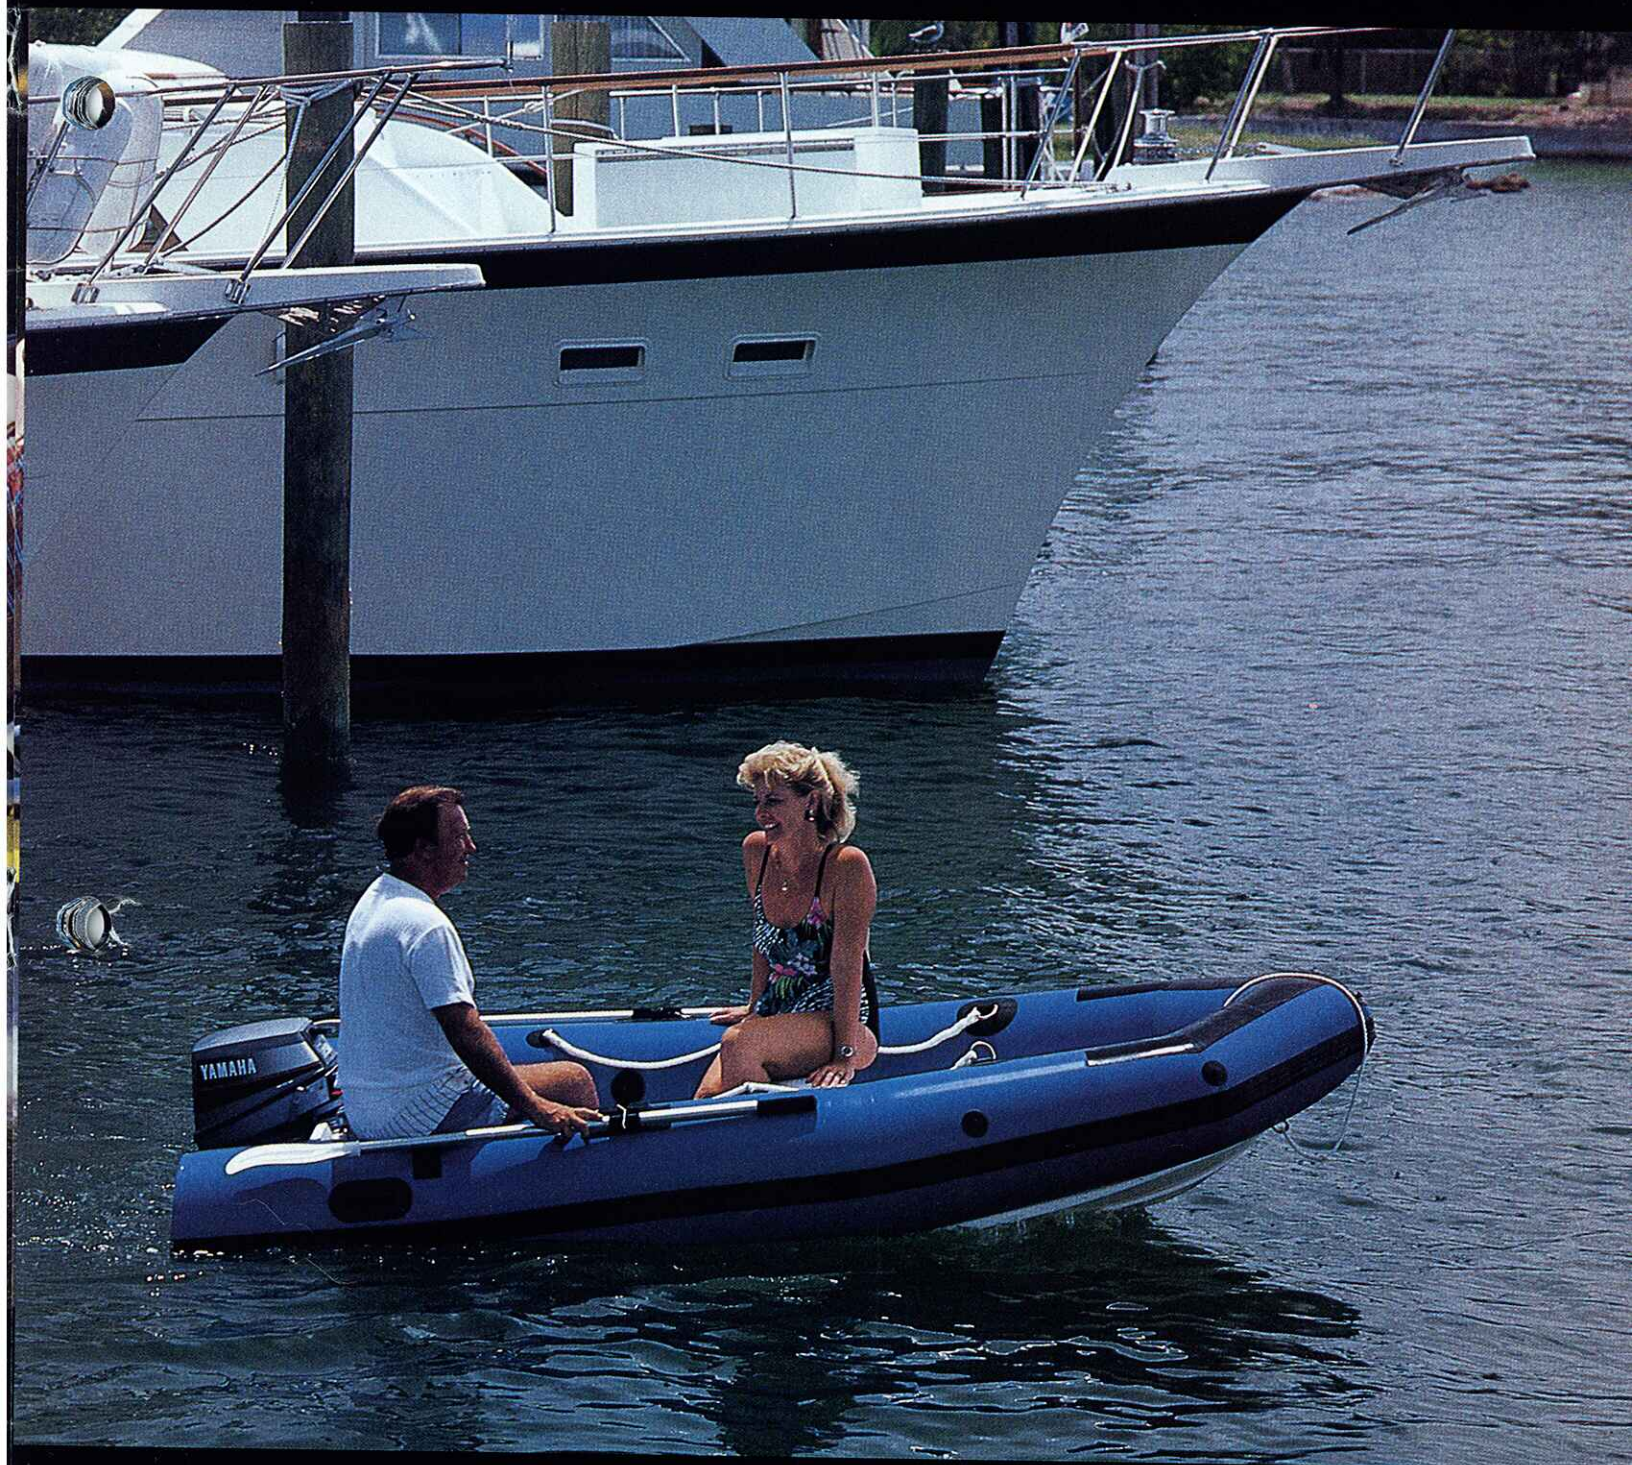

The same heavy-duty, Hypalon-reinforced fabric used on our regular inflatables is bonded to a tough rigid hull. The result is a high performance powerboat which takes a smaller engine and has much more buoyancy and seaworthiness than a rigid craft while still providing the same maneuverability.

The HB-100 is a terrific tender and roomy runabout. It's fast, fun and easily fits on top of a car. Also it has multi air chambers to make it virtually unsinkable.

GT SPORT DINGHIES: MORE VERSATILITY

The perfect tender that's much more than a tender! It's sturdy, steady and fast moving. And for 1988 the GT Sport Dinghies are more roomy with a brand new square bow design. Built with an aluminum floor, fiberglass transom and famous Achilles fabric, these handsome red and grey boats are virtually maintenance free. They inflate and assemble in minutes for true convenience and portability, making them practical and fun to take along in an RV or motor home. And even with a small outboard, this tender provides all the planing excitement of a high performance sportboat.

SPD SPORT DINGHIES: MORE CHOICES

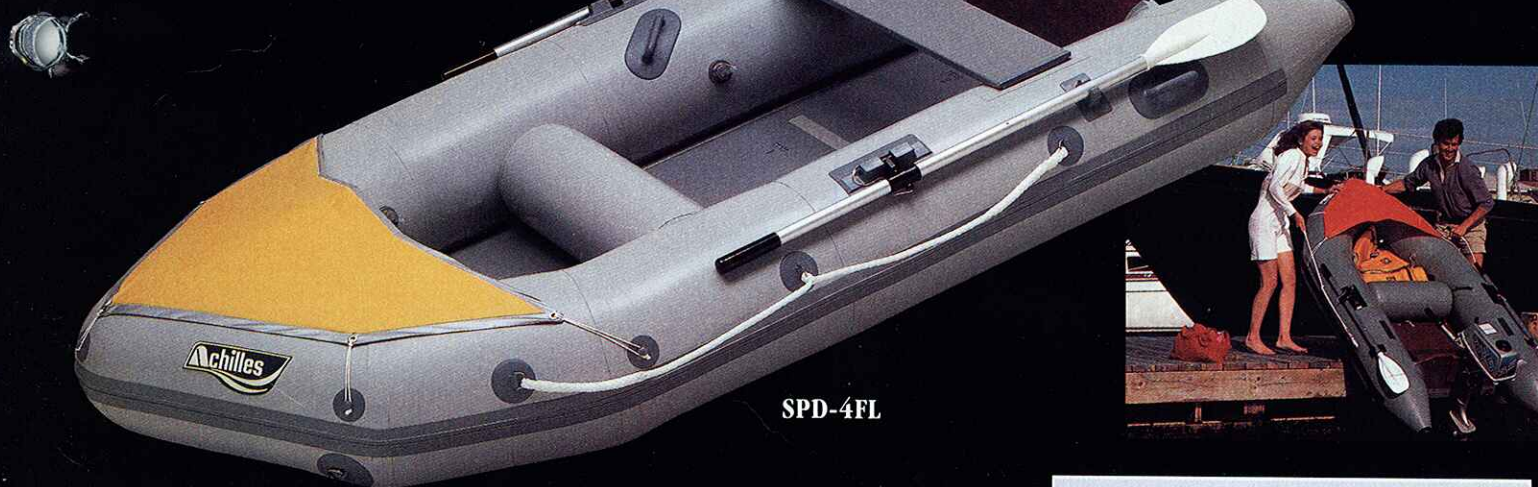

Our SPD-AD Sport Dinghies are a heavy duty version of our popular SPD-FL line. Designed to be a hard-working tender that can double as a sporty runabout, these advanced sport dinghies feature sportboat features like fiberglass-reinforced transoms and aluminum floorboard stringers. Plus a deep "V" keel insures top maneuverability and stability, even with heavy loads.

The Achilles SPD-2FL and SPD-4FL have become classic tenders among serious boaters. And last year we added the SPD-5FL to this immensely popular line to accommodate requests for a larger version to carry more people and gear. The same features that have made these boats favorites for years can be found in 1988; inflatable "V" keels, full-length wooden floorboards, solid wood transoms, classic oar system for easy rowing, wide beams and large tube diameters for outstanding stability and generous carrying capacity.

LS SPORT DINGHIES: MORE COMPACT

LS Sport Dinghies are more compact than the SPD Series but still provide outstanding stability and high carrying capacity because of their inflatable keels, full length wooden floorboards, wooden transoms, wide beams and large tube diameters. They also have an inflatable seat which not only allows for easy rowing, but which also provides an additional air chamber for extra safety. Very easy to assemble, they make excellent tenders for small and medium sized boats.

They also fill a number of other uses for active individuals and families. They fit easily into campers, pickups or car trunks and can be launched quickly in wilderness areas where there is no easy water access. Combined with their surprising roominess and remarkable stability, these qualities make LS Sport Dinghies ideal for hunting, fishing and camping. They are safe for children who will find an endless variety of ways to put these easy-to-handle boats to fun use.

LSR SPORT DINGHIES: MORE EASE

We introduced our roomy, compact LSR-4 in 1987 and it was such a hit among owners of smaller powerboats and sailboats that we have added the LSR-2 for 1988. Their roll-up floors make these boats remarkably simple to deflate and store anywhere quickly and easily. Because they take up so little space, it is ideal for boat owners, campers and others whose space is at a premium. Still, their square bows and large tube diameters allow them to store plenty of gear and carry a lot of weight.

Red	Blue or Grey/Yellow ● ●	Blue or Grey/Yellow ● ●

This new line was introduced in 1986 in response to demands for an economical dinghy tough enough to handle rugged chores but still compact enough to stow away easily. We have doubled the fabric of our LT series, added roll-up floors which remain right in the boat when they are deflated and stowed away, and made them available in handsome blue or yellow/grey. The result has been the most popular new inflatable dinghy introduced in years. You'd never expect so much from a dinghy for so little. And it's still made with Hypalon-reinforced fabric!

LT2 DINGHY: MORE ECONOMY

LT-2

A long time favorite of boaters requiring a small, convenient, economical dinghy that can be stored virtually anywhere and transported with incredible ease. Only 30 lbs., the LT-2 folds up into a compact, space-saving bag which can easily be stored in car trunks, campers or closets and transported by motorcyclists, bikers and even backpackers. Yet this attractive dinghy is still made with Hypalon/Neoprene for extra strength and durability.

One-year warranty on fabric and seams.

ACHILLES FOUL WEATHER GEAR

For 100% waterproof protection, you need Achilles AS-400 Foul Weather Suits. Made from a super-protective, watertight coating of Neoprene over a tough 210-denier/nylon shell and fully lined with tafeta, these suits represent the latest in foul weather fabric technology. All seams are heat-sealed for watertight strength. All closures are non-corrosive plastic or velcro. Available in a full range of sizes for men and women.

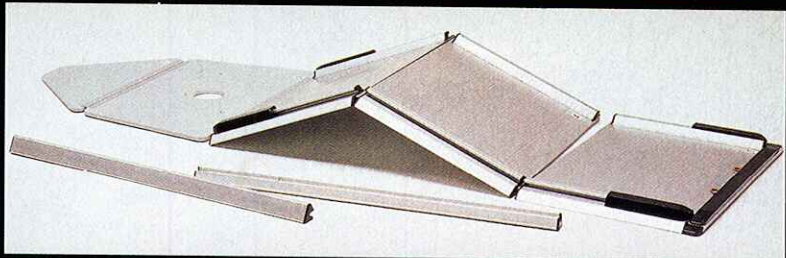

And new for 1988 are Achilles lightweight Foul Weather Suits and handsome Foul Weather Jackets! Ask for the Achilles Foul Weather Gear brochure at your Achilles Boat Dealer or call or write Achilles.

MORE ACCESSORIES

Achilles accessories are as famous for their lasting quality as are their Achilles boats. Each accessory is carefully manufactured or selected to insure that it meets the same exacting standards we demand of our boats. And like our boats, they are backed by warranty.

Our wide range of accessories options is designed to fill practical needs for boaters by allowing them to outfit their Achilles boats to meet their specific needs.
