

A C H I L L E S

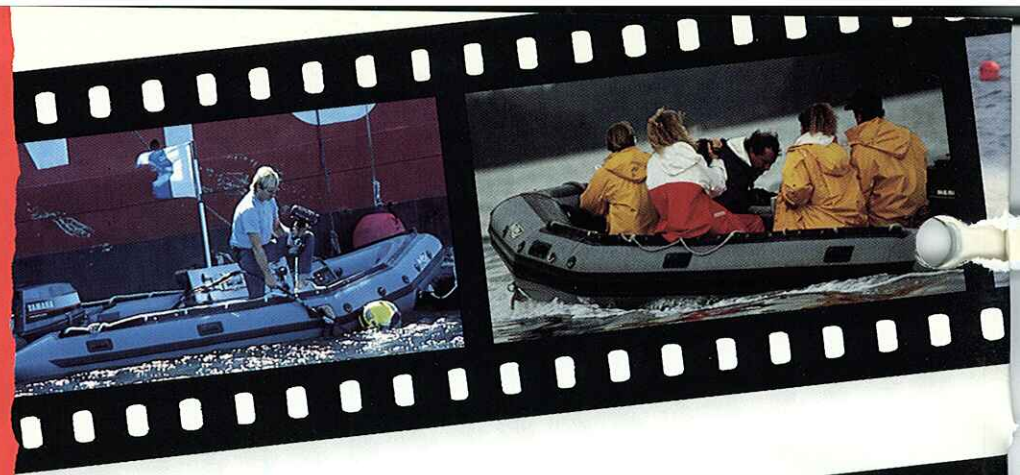

N I N E T Y T H R E E

Achilles Inflatable Boats are used by boaters around the world who demand quality and dependability because their safety and comfort depend on it. That is why Achilles is the first choice of more and more professionals — marine researchers, rescue teams, commercial fishermen, professional divers — who know they cannot find a better designed, better constructed or better performing inflatable. And the Achilles boats that meet their high expectations are the *same* ones we make for recreational boaters.

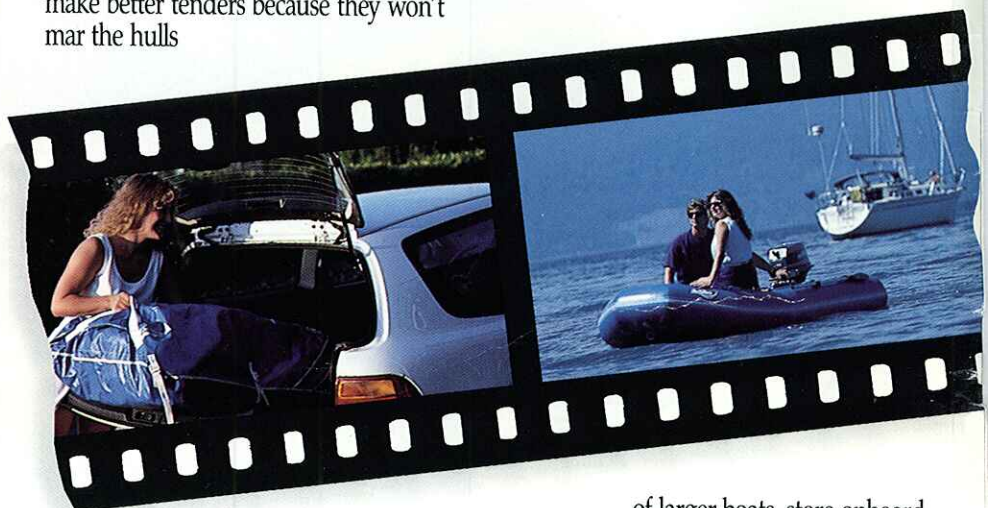

At Achilles, every boat is designed to be the best in its class. From our smallest dinghy to our largest workboat, every Achilles boat is individually designed and equipped to fill a specific boating need. We do not mass produce *factory* boats, we develop *people* boats. So every Achilles boat has just two things in common. One is Hypalon[®]-reinforced fabric because our experience has shown us that this is the most durable inflatable boat fabric. The other is *quality*.

At Achilles, "quality" is not just a word, it's a commitment. And this commitment can be seen in each and every one of our 1993 models. Look closely. Compare inflatables. Talk to experts. You'll learn the overall quality of an Achilles boat is unsurpassed. After that, you won't have to consider "which inflatable" is right for you, only "which Achilles."

ACHILLES INFLATABLES: MORE OF AN ADVANTAGE.

Inflatable boats deliver the best of boating. They are easier than traditional rigid hull boats to transport, store and launch. They are buoyant, stable and safe. Because they are lighter, they perform just as well with smaller motors. Smaller inflatables make better tenders because they won't mar the hulls

of larger boats, store onboard easier, and bounce off collisions with docks. Larger inflatables provide all the sportboat excitement of rigid hull boats. From waterskiing to fishing and scuba diving, they make it easier to enjoy the best that boating has to offer.

Achilles quality enhances all the advantages inflatable boats have to offer. They are designed to be both practical and exciting, so safety and performance are combined in every Achilles boat. Inflatable boats can do a lot, and Achilles inflatables do a lot more.

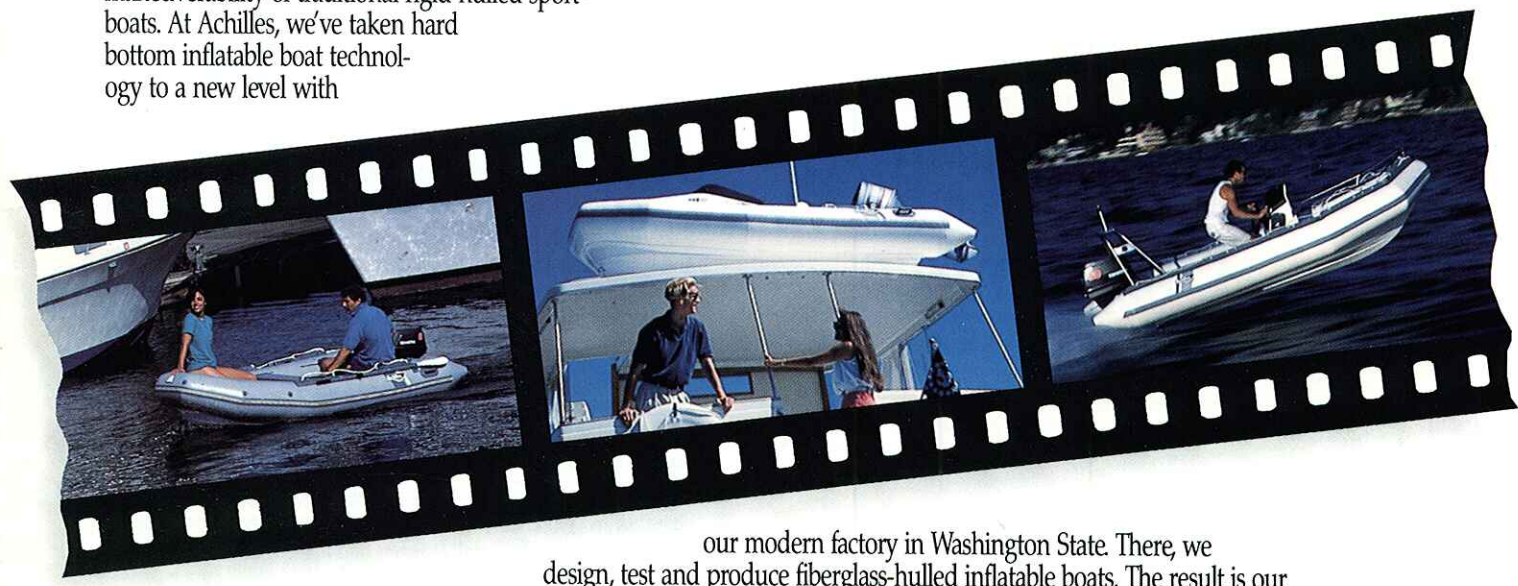

QUALITY

ACHILLES HARD BOTTOMS: THE BEST OF BOTH WORLDS.

Fiberglass-hulled inflatables combine all the safety, stability and practicality of a well-built inflatable with the high-performance maneuverability of traditional rigid-hulled sportboats. At Achilles, we've taken hard bottom inflatable boat technology to a new level with

our modern factory in Washington State. There, we design, test and produce fiberglass-hulled inflatable boats. The result is our exciting HB Series of hard bottom inflatables. Smaller HB models provide large boats with practical tenders which double as sporty fun boats. Our larger HB boats deliver all the sportboat excitement you want in a lighter package that is easier to get around and in and out of the water.

Enjoy the best of both worlds with an Achilles Hard Bottom Inflatable. It's the perfect boat for getting the most out of boating.

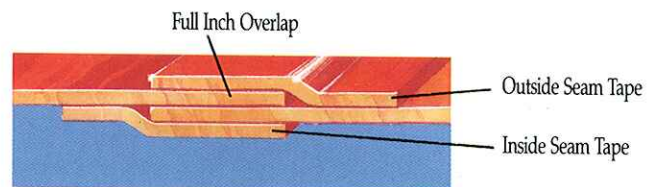

ACHILLES
HB Series
Made in the USA

The more you know about inflatable boats, the more you will appreciate the commitment to quality at Achilles. This commitment can be seen in the meticulous attention to detail given to every feature on every Achilles boat. Once you have the chance to compare inflatables, you will be impressed with all the little "extra steps" we take to insure the highest level of quality in all our features. From convenience features like our unique fold-down oar system, to safety features such as double-taped seam construction, no detail has been overlooked in fitting our boats with the standard features that make them the best in their class.

Our confidence in the quality of Achilles boats is backed by a full Five Year Warranty on both the fabric *and* the seams. And this applies to *all* our boats, not just our top-of-the-line models. That's because every one of our boats is designed to be the best.

QUALITY MEANS SAFETY

Safety and quality go hand-in-hand, so we are always building more and better safety features into Achilles boats. This is why we overlap our seams a full inch and add seam tape both outside *and* inside for extra safety. No one reinforces their seams more thoroughly than Achilles.

More air chambers mean more safety, so you won't find a competing inflatable with more chambers than a comparable Achilles model. More often, you'll even discover that the Achilles will have at least one more air chamber.

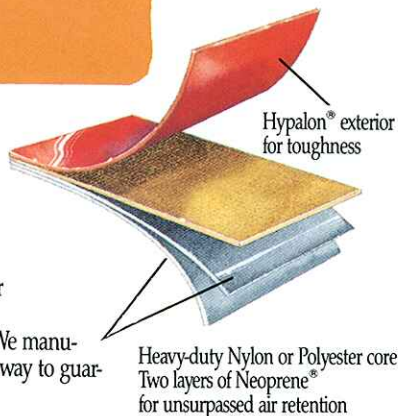

The list of safety features on Achilles boats goes on and on. Our fiberglass and wood transoms are made to last. Our extra bow rings, safety grip handles, fuel tank fasteners and full-length rubbing strakes are standard on most models because they make for a more complete, safer boat. The Achilles bulkhead baffle system keeps our multiple air chambers completely sealed off from one another, while working to equalize air pressure between compartments. And the non-corrosive valves on all our boats are double-sealed for safety.

QUALITY MEANS THE BEST FABRIC

The fabric is the single most important factor in an inflatable boat, and no one makes a tougher, more durable fabric than Achilles. We manufacture our own fabric, since this is the only way to guarantee consistent quality.

Every Achilles boat is made with a durable DuPont Hypalon® reinforced fabric for the best possible resistance to damage from abrasions, oil, gasoline, warm salt water or ultraviolet rays. Hypalon is calendered over the exterior of a tough nylon or polyester core. Our standard line boats and heavy-duty line boats are distinguished by the relative weight and thickness (denier) of the core fabric. The inside of our core fabric is coated with two layers of Neoprene because this elastomer is extremely flexible and airtight. This guarantees that Achilles boats will remain fully inflated longer, even in extreme temperatures.

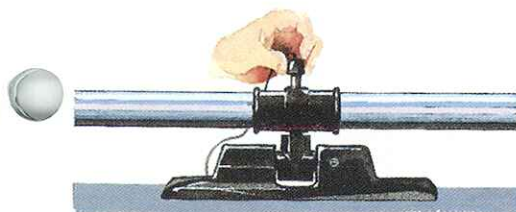

FEATURES

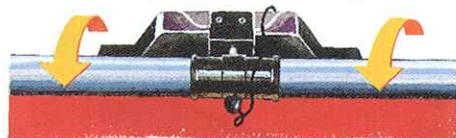

NO COMPROMISE IN QUALITY

**FIVE YEAR WARRANTY
ON FABRIC AND SEAMS**
WE BACK OUR CLAIM TO HAVING THE
BEST FABRIC AND CONSTRUCTION
IN THE INDUSTRY WITH A STRONG
WARRANTY COMMITMENT.

QUALITY MEANS CONVENIENCE

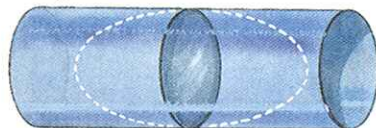

Achilles oars lock into place and fold out of the way when not in use.

We pride ourselves in making *people* boats that are as comfortable and easy to use and enjoy as possible. Our carefully designed oar system not only makes rowing easier, it also keeps oars locked out of the way when not in use. The unique Achilles fold-down oar system also includes two-piece aluminum oars which are locked in place so there is never any chance of losing one.

In addition to our convenient oar system, you will find standard seating in Achilles dinghies and tenders designed to make them as comfortable as possible. Double carry bags for larger boats make them easier to transport.

Achilles boats deflate quickly and easily by moving the valve caps.

Our baffle system helps equalize air pressure between air chambers. Everything from the careful placement of lift and carry handles, towing rings and safety lines to complete maintenance kits and removable bow spraydodgers are the result of our ongoing commitment to producing a truly "user friendly" boat.

QUALITY MEANS THE BEST WARRANTY

"Five Year Warranty on Fabric and Seams"

We back our boats with an outstanding five-year warranty on both fabric and air-holding seam construction. In addition, Achilles gives a one-year warranty on the transom and all attachments and accessories. All this is back up by a network of warranty repair stations throughout the United States and Canada. We believe our commitment to quality does not end with just producing a great boat, it ends with keeping every Achilles owner satisfied.

QUALITY MEANS MORE!

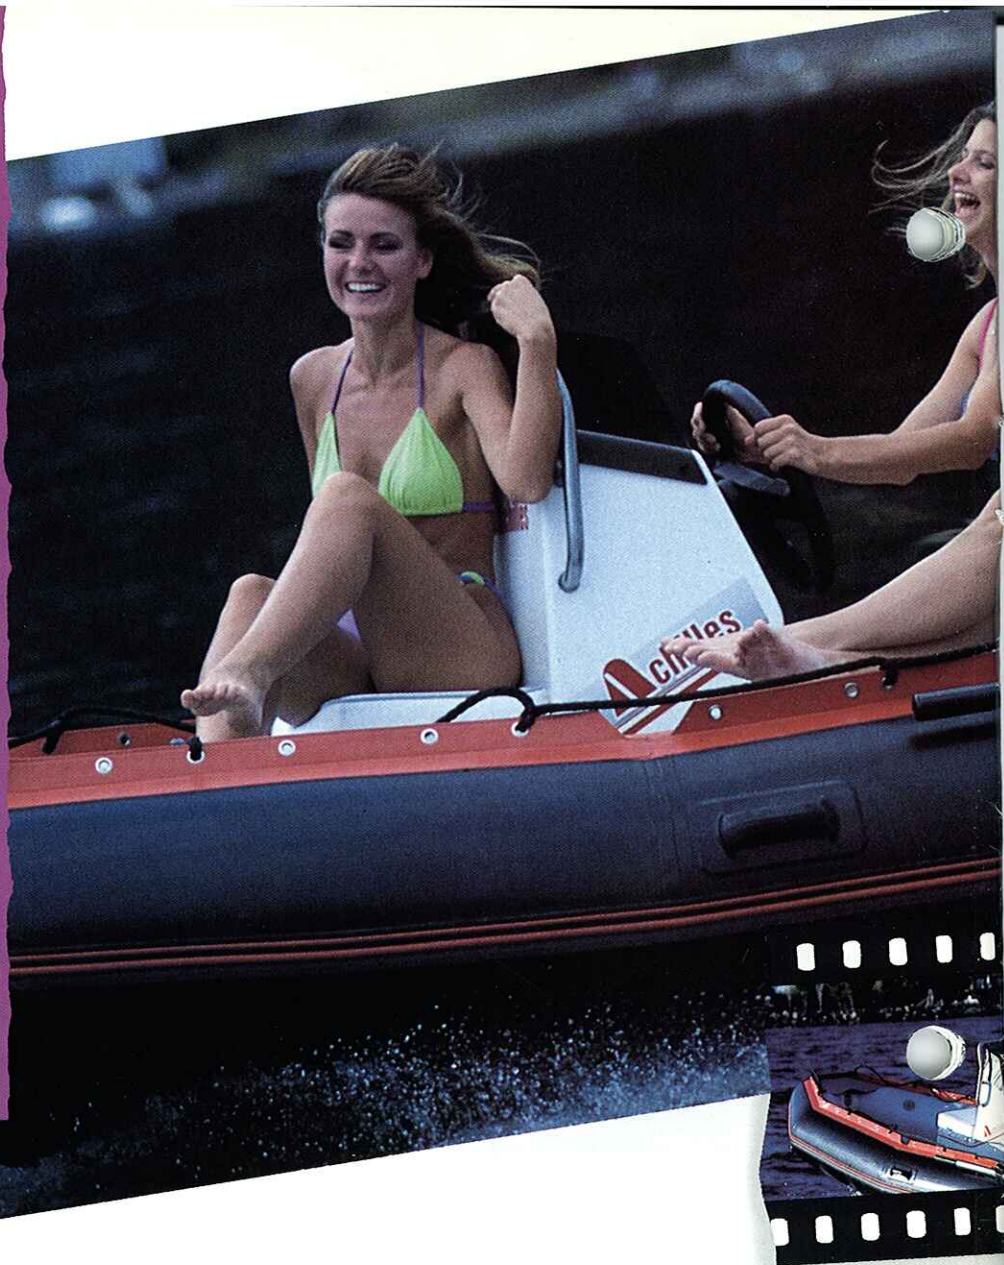

With Achilles you have more options to choose from so you can find the boat that is just right for you. We offer more types of hard transom designs, all with an aluminum motorplate to provide extra protection from damage from engines and clamps, and to prevent engine "ride-up." Achilles also offers more types of floor options since the requirements of every boat are different. Aluminum, wood, roll-up, inflatable and fiberglass rigid hulls will be found on various Achilles models. And our self-locking floor systems go in quickly and easily to provide a sturdy, rigid floor for comfortable boating.

Achilles boats come in more distinct designs because each series is designed individually to fill a specific purpose. We do not offer a basic design which is simply adapted to different size boats. This results in boats that simply perform better.

You will also find more standard features on Achilles boats as part of our commitment to sell safe, practical and complete boats.

With Achilles, you simply get more.

These "top-of-the-line" models continue to set the standard for inflatable sportboats. Built for high performance with deep "V" trigon air keel hulls. Achilles SG boats offer a host of features designed to make any sportboating activity safe and comfortable as well as exciting. A roomy, square bow configuration provides room for extra gear, and an aluminum floor system delivers superior traction, rigidity and durability. Achilles SG sportboats bring performance and practicality together for better water skiing, diving, fishing or all-around sportboating pleasure!

SQUARE BOW CONFIGURATION provides more interior space

ALUMINUM FLOOR-BOARDS AND STRINGER SYSTEM delivers the best combination of traction, rigidity and durability.

FULL-LENGTH "TEARDROP" RUBBING STRAKE protects the boat from scrapes and abrasions.

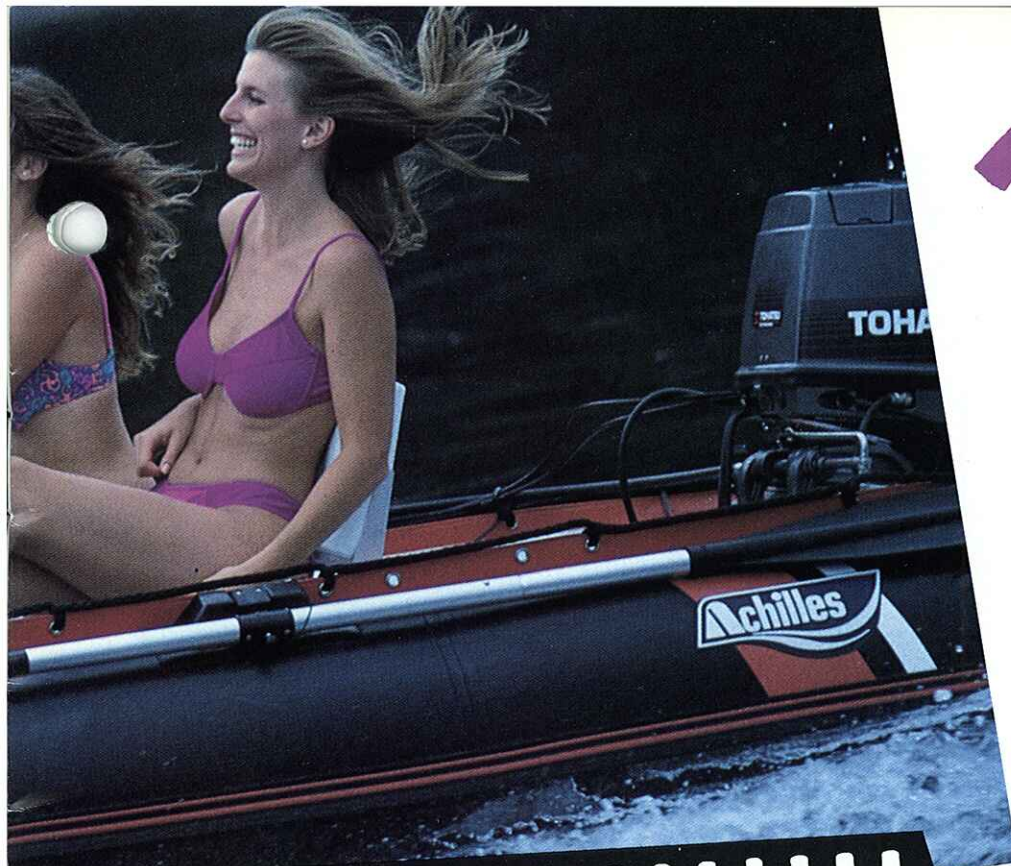

SG-176

FIBERGLASS TRANSOM WITH PROTECTIVE MOTOR CLAMP PLATE for ultimate transom strength and durability.

SG-124

SG-140

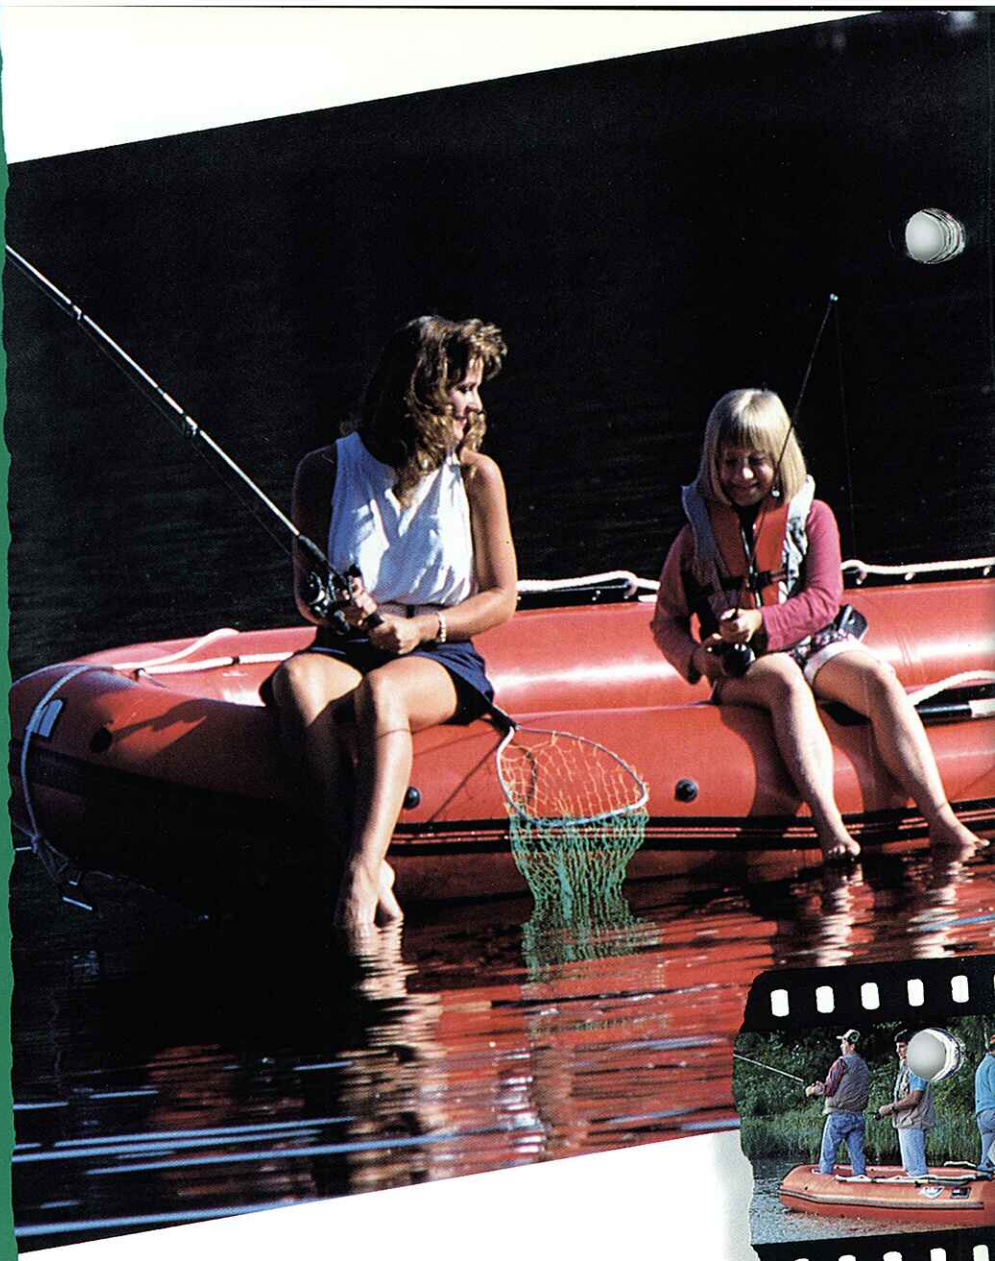

SG Series Standard features include: roomy square bow configuration; trigon air keel; aluminum self-locking floorboards with aluminum stringer system; fiberglass transom with protective motor clamp plate; fuel tank tie-downs; self-bailer valve; full-length tear-drop rubbing strake; fold-down locking oar system with two-piece breakdown aluminum (except SG-156 & SG-176); bow carry handle; lift & carry handles; towing bridle; high-speed helmsman grip; life lines; full-length splash guard; snap-down transom splash guard; removable bow spraydodger; bow holdall fitting points; bow deck fitting points; cushion seat fitting points; large, non-corrosive check valves; large, high-volume foot pump; double carry bag system; deluxe maintenance kit.

ur SE boats are built to be the most convenient, full-size inflatable sportboats on the market. Their square bow configuration allows for more interior space without increasing overall length, an important advantage for a tender or family fun boat. They are light weight for maximum portability while still providing the unsurpassed strength provided by our Hypalon[®]-reinforced polyester fabric. With two carry bags, one person can easily take these boats anywhere, but once inflated each SE boat carries over five people and handles heavy loads easily. On the water, the performance is still vintage Achilles with superb sportboat handling and maneuverability. Either as large tender or all-around fun boat, Achilles SE Sportboats are a great value.

HIGH-SPEED HELMSMAN GRIP

FOLD-DOWN LOCKING OAR SYSTEM with TWO-PIECE ALUMINUM OARS keeps oars securely fastened and out of the way when not in use.

ALUMINUM STRINGER SYSTEM locks wood floorboards securely in place.

he best of both worlds!
The "Made-in-the-USA"
Achilles HB series combines
the safety, stability and porta-
bility of an inflatable with the
performance of a deep "V"
rigid hull boat.

Achilles continues to break
new ground in hard-bottom
inflatable boat technology at
our factory in Washington
State, where we design, test
and build only rigid hull inflat-
ables. Achilles now produces
seven exciting HB models,
including the HB-90, HB-100
and HB-110 which make sporty
tenders for any boat. Their
light weight puts less strain on
davit systems, and their soft
sides lessen the possibility of
any damage to yachts.

HYPALON®-REINFORCED FABRIC TUBES for outstanding strength and durability.

ROOMY, SQUARE BOW DESIGN for more interior space.

LAYERED DEEP "V" FIBERGLASS HULL & TRANSOM for true rigid hull performance.

DAVIT LIFTING POINTS for adapting easily to davit systems.

FULL-LENGTH RUBBING STRAKE to prevent scrapes and abrasions.

REMOVABLE WOOD SEAT AND ACHILLES FOLD-DOWN LOCKING OAR SYSTEM standard on HB-90 and HB-100 models only.

HB-100

HB-90

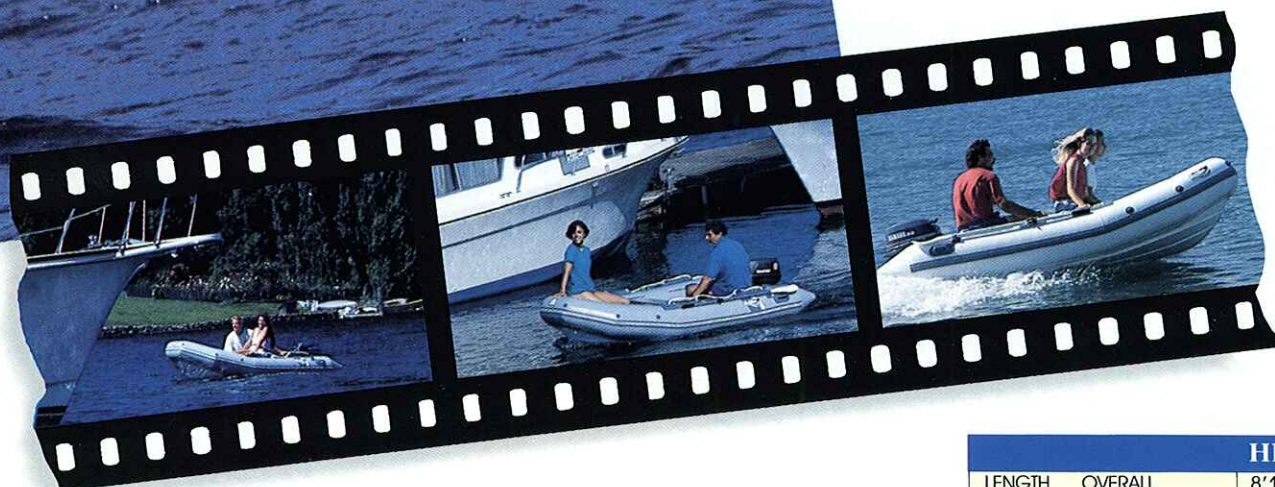

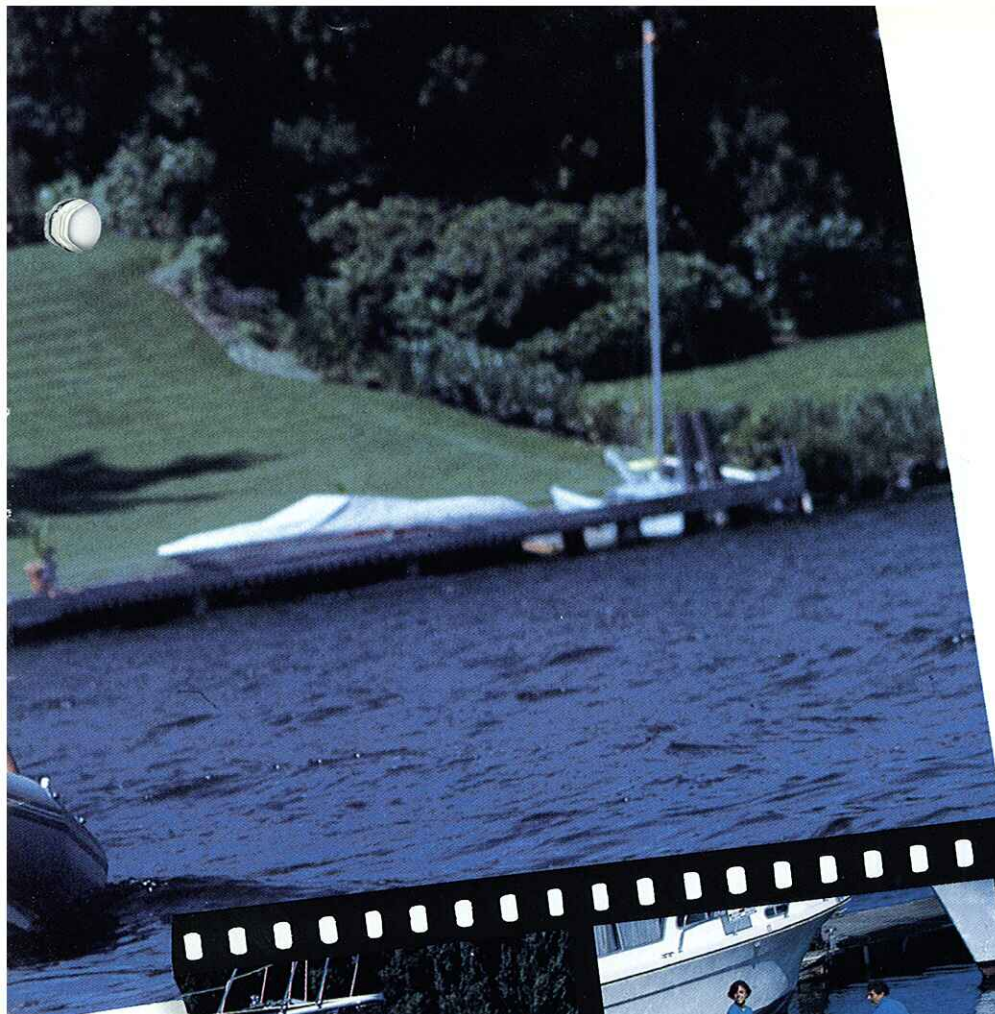

HB-100 standard features include: layered, deep "V" fiberglass hull & transom; roomy, square bow configuration; davit lifting points; bailer plug; full-length rubbing strake; fold-down, locking oar system with two-piece breakdown aluminum oars & oar holders; towing eye-bolt with painter line; lift & carry handles; lacing cuff with life lines; removable wood rowing seat; removable bow spraydodger; large non-corrosive check valves; high-volume foot pump; deluxe maintenance kit; transom anti-splash guard.

The Achilles HB-124 and HB-140 rigid hull models are sensational sportboats as well as terrific tenders for larger boats. Their outstanding performance, combined with their roominess, make them great for waterskiing, diving or just speedboating. They are lighter than other sportboats, and launch quickly and easily. Plus they offer a horsepower to weight ratio that makes a very fuel-efficient package. Their stability, carrying capacities and fabric tubes (which won't mar other boats) make them unsurpassed tenders. Both are made in the USA and promise to be the class of the rigid hull market in 1993!

HYPALON®-REINFORCED FABRIC that is unsurpassed for air retention as well as durability

LAYERED DEEP "V" FIBERGLASS HULL & TRANSOM for outstanding performance and maneuverability.

FULL-LENGTH SPLASH GUARD WITH LIFE LINES for dry, safe rides, even at high speeds.

FULL-LENGTH RUBBING STRAKE for extra protection from collisions with docks, rocks and other boats.

ROOMY, SQUARE BOW DESIGN for increased interior space without increased length overall.

HB-140

HB-124

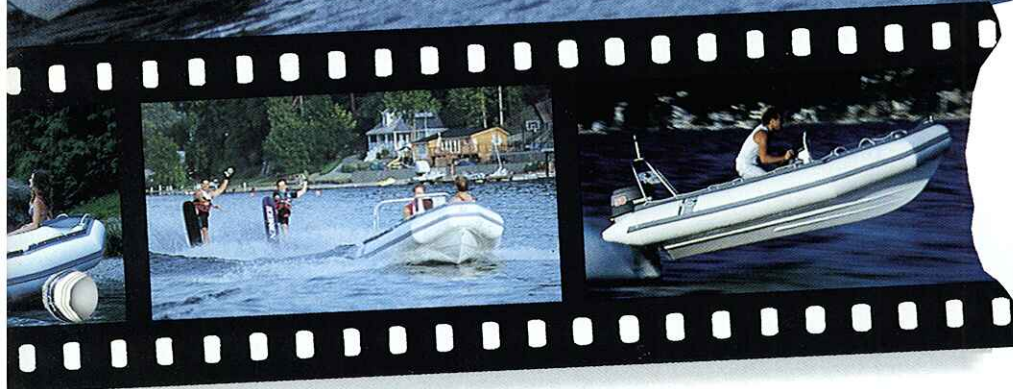

HB-140 Standard features include: layered, deep "V" fiberglass hull and transom; roomy, square bow configuration; davit lifting points; bailer plug; full-length rubbing strake; paddle and paddle straps; towing eye-bolt with painter line; full-length splash guard with life lines; bow deck fitting points; large, non-corrosive check valves; high-volume, large foot pump; deluxe maintenance kit; transom anti-splash guard.

HB ACCESSORIES

Customize your Achilles Hard Bottom boat with a range of quality accessories designed to enhance the enjoyment of these exciting Made-in-the-USA models.

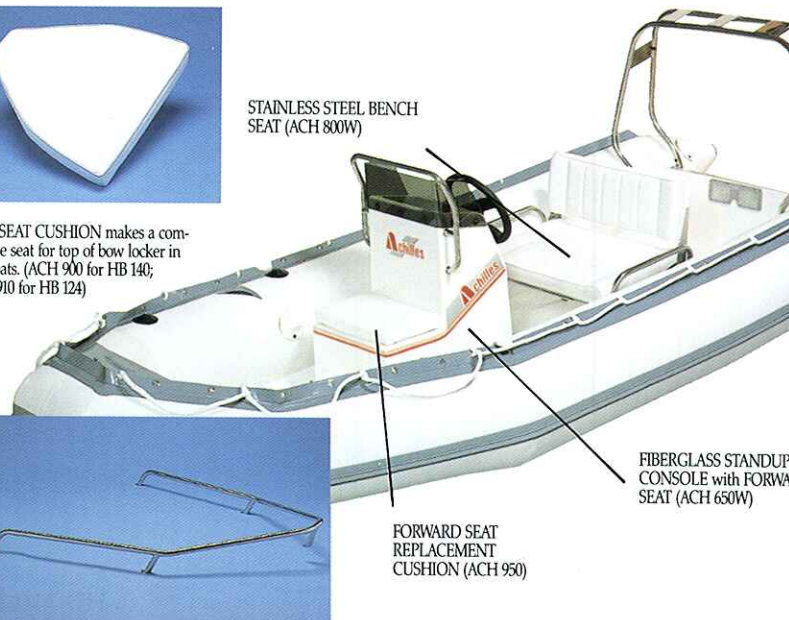

STAINLESS STEEL BENCH SEAT (ACH 800W)

BOW SEAT CUSHION makes a comfortable seat for top of bow locker in HB boats. (ACH 900 for HB 140; ACH 910 for HB 124)

STAINLESS STEEL COLLAPSIBLE BOW RAIL provides extra safety and convenient fitting points for HB-140 boats (ACH 710)

FORWARD SEAT REPLACEMENT CUSHION (ACH 950)

FIBERGLASS STANDUP CONSOLE with FORWARD SEAT (ACH 650W)

UNIVERSAL AFT SPOILER (ACH 610)

HB STAINLESS STEEL AFT SPOILER custom-designed for HB-140 is ideal for mounting lights, antennas, etc. (ACH 615)

The next generation of fiberglass-hulled inflatables has arrived! Our brand new, fully-equipped HB-110 and HB-124 Sports promise to take fun sportboating to a new level. These exciting Sports dart through the water while handling like a dream. Their standard steering consoles make them easy—and fun—to drive. They also come equipped with a host of other special standard features like fiberglass bow deck, back-to-back seating for up to four people, below-seat gas tank, and tinted windshield.

If you own a large boat, you won't find a sporty tender that's more fun than the Achilles Sports. If you're looking for your first sportboat, here it is—fully equipped with everything you need! And remember, it's a hard-bottomed inflatable, so getting it around and taking care of it is a cinch. The Achilles HB Sports—fun boating on a higher plane.

HB Sport Standard Features include: fiberglass bow deck, back-to-back seating for four people, below-seat gas tank, tinted windshield, layered, deep "V" fiberglass hull and transom; roomy, square bow configuration; davit lifting points; bailer plug; full-length rubbing strake; paddle & paddle straps; towing eyebolt with painter line; lacing cuff with life lines; large non-corrosive check valves; high-volume foot pump; deluxe maintenance kit; gas tank tiedown; steering wheel; steering cable; glove box with drink holder; transom anti-splash guard.

he luxury tender that's much more than a tender! In addition to being roomy, reliable support boats, GT boats are packed with our top sportboat features, like aluminum floorboards, making them as fun as they are practical. So these sport tenders are as exciting as they look with their new light grey color.

When you compare features with other inflatables this size, you'll see that our GRAND Tenders really live up to their name.

P

roportionately larger tube diameters make these sport dinghies more compact without sacrificing load capacity. So they're dependable, hardworking tenders for small and medium-sized boats. Their larger tubes and multiple air chambers also make them exceptionally safe, stable boats that families can take anywhere. And their extra stability makes them great for fishing or hunting.

If you're looking for a safe, reliable and hardworking boat to use as a tender or family fun boat, look no further!

FULL-LENGTH WOOD FLOORBOARDS lock into place and are secured with plastic stringers (aluminum stringers for LS-5).

WOOD TRANSOM is protected by aluminum motor plate.

INFLATABLE ROWING THWART for comfort and convenience.

THE ACHILLES FOLD-DOWN OAR SYSTEM and **TWO-PIECE ALUMINUM OARS** lock oars in place and eliminate possibility of losing an oar.

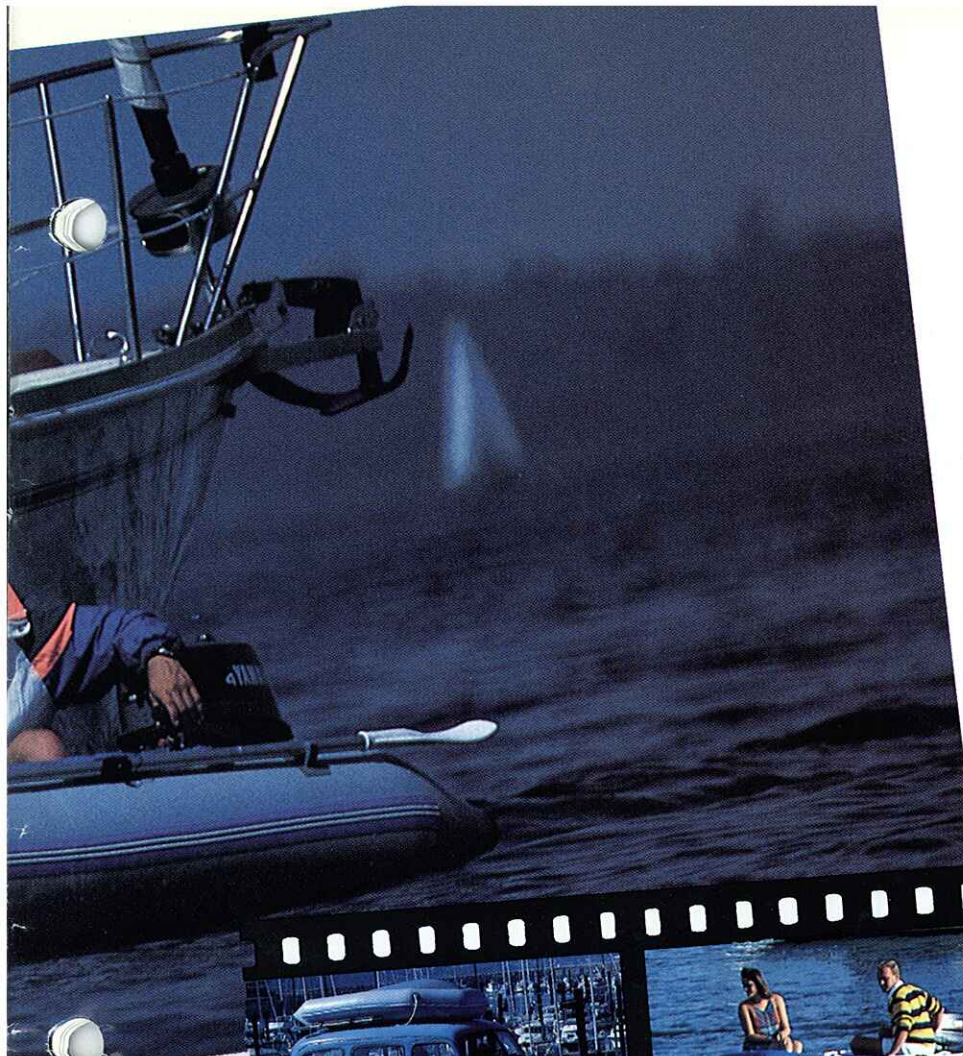

AIR KEEL for better handling.

TOWING BRIDLE makes towing easy and efficient.

RUBBING STRAKE provides extra protection against contact with docks and other objects.

Introduced in 1992 with one model, our LX-290 was so successful we've expanded and improved the line to include three model options for 1993, all in a striking new blue color. Now called the LEX (Light Sport Extra) Series, these boats continue to offer all the quality and many of the features of our popular LS (Light Sport) series. In addition to the same Hypalon®-reinforced fabric, this economical version features the same basic square bow design, including air keel and floorboards as LS boats.

A great value for practical-minded boaters in 1993!

FIXED WOOD TRANSOM protected by an aluminum motor clamp plate

SELF-LOCKING WOOD FLOORBOARDS with **STRINGER SYSTEM** for a dependable floor.

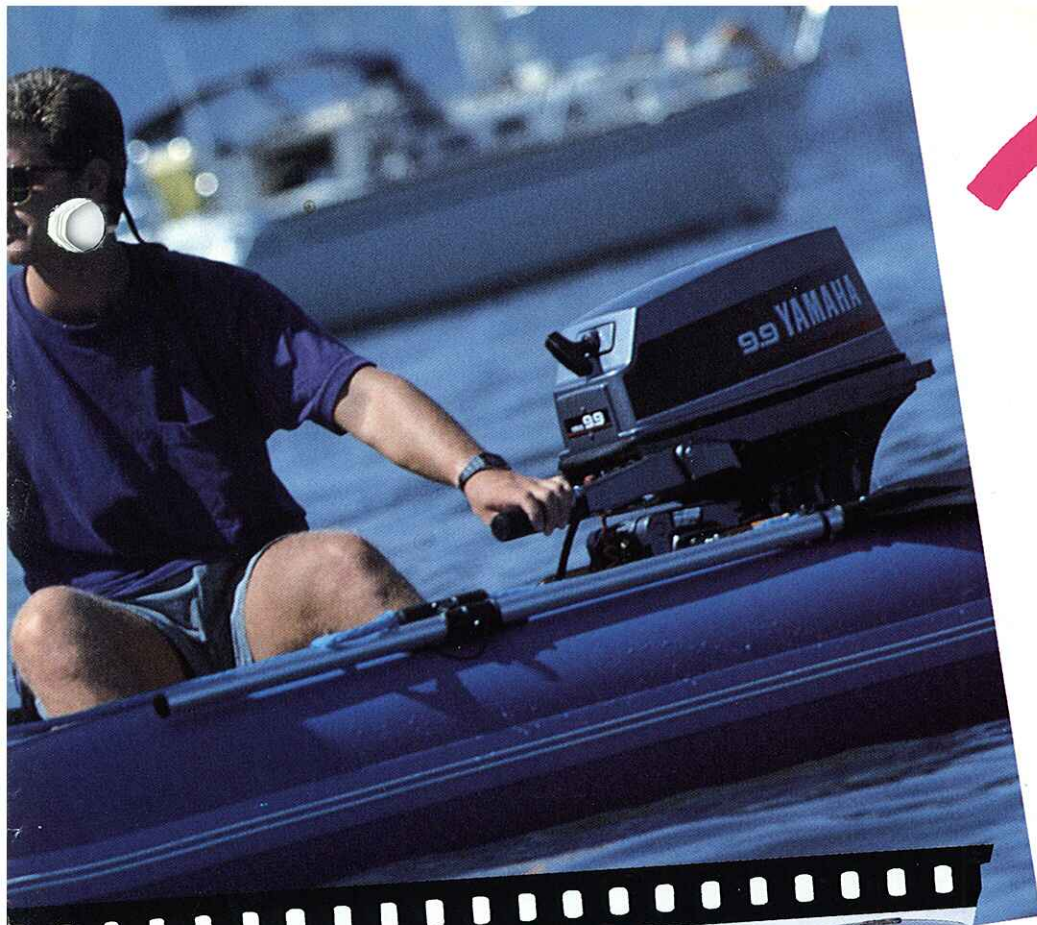

ACHILLES FOLD-DOWN, LOCKING OAR SYSTEM and **TWO-PIECE OARS** make rowing as simple as possible.

T

ake the great features of our Light Sport boats, add the convenience of a rollup or inflatable floor and you have our popular LSR and LSA boats. We've answered the demand for a safe, practical and roomy tender for smaller boats where space is at a premium. We've also created the ideal boat for active families since both boats fold flat and fit easily in campers, trailers or even car trunks. These tough, compact models assemble and deflate in minutes and can't be beat for ease in storing or transporting.

If you're looking for a roomy, practical tender for your smaller power or sailboat, or for a safe family fun boat that goes anywhere easily, these are for you!

LSR/LSA

STANDARD

BELLINGHAM, WA.

LSR-4

LSR/LSA Standard features include: rollup wood floor or inflatable floor; wood transom with protective motor clamp plate; self-bailing valve; full-length rubbing strake; fold-down locking oar system with two-piece breakdown aluminum oars & oar holders; bow carry handle; life lines; fixed wood rowing seat; large, non-corrosive check valves; high-volume foot pump; carry bag; maintenance kit.

BOW CARRY HANDLE
makes it easy to carry when assembled.

FIXED WOOD ROWING SEAT
positioned for easy rowing.

FOLD-DOWN, LOCKING OAR SYSTEM with TWO-PIECE ALUMINUM OARS keeps oars secured and out-of-the-way when not being used.

PROTECTIVE MOTOR CLAMP PLATE protects the wood transom from motor clamps.

Our most economical dinghies have been redesigned for 1993 to make them even more convenient and practical than ever before. But they're still made with the same tough Hypalon®-reinforced fabric as all our larger boats and backed by the same five-year warranty.

Both the LT-2 and the LT-3 come with wood seats, fold-down oars and floors. The LT-2 has a fold-up floor while the LT-3 features a rollup floor. These two lightweight wonders will store virtually anywhere without sacrificing anything in terms of safety. Achilles LT boats represent the best value you'll find in an economical dinghy.

LT2/LT3

STANDARD

LT-2

LT-2 Standard features include: fold-up wood floor; full-length rubbing strake; fold-down locking oar system with two-piece breakdown aluminum oars & tiedowns; bow carry handle; life lines; fixed wood rowing seat; large, non-corrosive check valves; high-volume foot pump; carry bag; maintenance kit.

Motor mounts shown are optional.

SU boats are built tough to work hard for rugged private and commercial use. They are made with an additional heavy-duty layer of 840-denier nylon fabric in a two-ply technique which results in a core fabric even stronger than a single base fabric of equal thickness. A number of exclusive features are built into these boats which combine to bring the advantages of an inflatable together with the demands of tough commercial marine use.

If your needs run to commercial or rugged personal use, choose the boats selected by commercial users and marine research groups the world over for their strength, durability and reliability.

SU-16

EXTRA HEAVY DUTY

SU-18

Standard features include: roomier bow configuration; toughest double (840 denier each) nylon core fabric; trigon air keel; aluminum self-locking floorboards & stringers system; fiberglass transom with aluminum plate (exterior) & motor pad (interior); fuel tank tie-down; large self-bailer (duck bill type); extra-wide, heavy-duty, full-length teardrop rubbing strake; tie-down straps for paddles; bow carry handle; towing bridle; lift & carry handles; splash guard with life lines; heavy-duty reinforcement cargo wear patch all around; extra tie-down D-rings; large non-corrosive recessed valves; two (2) high-volume large foot pumps; deluxe maintenance kits.

RIVERBOATS

Achilles also produces a complete line of advanced riverboats with models for professional outfitters, serious river runners and recreational boaters. All loaded with features designed to help you get the most out of any whitewater experience, including a self-bailing series with a lace-in inflatable floor. Call or write for the Achilles Riverboat catalog.

AND MORE

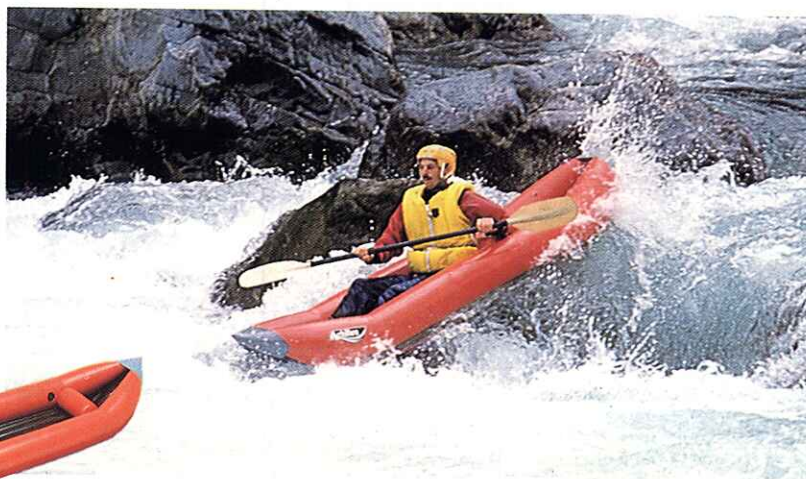

FOUL WEATHER GEAR

Good news for bad weather! Our line of stylish and technically advanced foul weather gear has more great products to choose from than ever before! All providing 100% waterproof protection and made with the latest fabric innovations, including a Hypalon® reinforced fabric! Choose from traditional foul weather suits with chest-high trousers in both regular and lightweight versions, or lightweight suits with waist-high pants for more comfortable protection. Also available are colorful all-weather jackets which look great anywhere! Call or write for the Achilles foul weather catalog.

INFLATABLE KAYAKS

The most fun you'll ever have in white-water! Achilles' inflatable kayaks make it easy to get into whitewater boating or calm water paddle sports. Stable, maneuverable and forgiving, Achilles kayaks can handle challenging rapids, waves or holes. Made with Hypalon® for durability and a removable inflatable floor for comfort and extra bouyancy, they are lightweight and compact enough to be easily backpacked... Call or write for more information.

A

chilles quality shows in our superb selection of inflatable boat accessories. The right accessories will make your Achilles boat even more comfortable and functional. Check with your Achilles dealer regarding which accessories are right for your boat.
