

FEATURES

All Achilles Riverboats are loaded with the features you want to have on any type of whitewater. From the basic fabric and construction through such details as strategic placement of "D" rings, Achilles quality is evident in every aspect of our boats. No one in the world possesses more advanced inflatable boat technology than Achilles, and this technology is found in every Achilles Riverboat.

Multiple "D" Rings

You will find stainless steel "D" rings located throughout Achilles boats to insure you have one wherever it may be needed, including 80mm rings for frame tie-down. All "D" rings are doubly reinforced to make sure they hold tight under the most extreme conditions.

The Toughest Fabric

The tough nylon core fabric of every Achilles Riverboat is coated with both Hypalon® and Neoprene® for unsurpassed durability. Hypalon® is calendared under extremely high pressure to the fabric exterior to provide the best protection against damage from abrasions, punctures and weathering. Two interior layers of Neoprene® insure that all Achilles boats will be extra airtight, and retain optimum inflation levels longer.

Heavy-duty Nylon Polyester core Two layers of Neoprene® for unsurpassed air retention

The Strongest Seams

Achilles produces the only Riverboats with seams that are overlapped a full inch and reinforced with seam tape inside and out. Some riverboats depend on a one-half inch overlap with no seam tape. Achilles seams are made to be the strongest in the industry.

More in the Floor

The floors of all standard Achilles Riverboats are a heavy-duty 1260 denier and fully-wrapped for ultimate safety. They are also reinforced with wear patches at potential abrasion points for doubleprotection.

Recessed Valves (RS Series)

These valves out of the way of passengers, lines and gear.

Leaffield Valves (RV Series)

These smooth, low-profile valves are the standard for reliability and durability.

The Right Boat for Whitewater

Achilles has more ways to get the most out of any whitewater experience. From rugged self-bailing riverboats for professional use to inflatable kayaks for great individual fun, there is an Achilles designed to meet any whitewater need. And every one is made with 80% Dupont Hypalon® because our experience as one of the world's leading manufacturers of inflatable boats has shown us this tough elastomer provides the best protection.

We are able to ensure quality because we design all our riverboats and kayaks and also manufacture our own Hypalon fabric. That way we have control of the manufacturing process from start to finish and we know our high levels of quality control and attention to detail are met every step of the way.

Achilles is happy to provide custom fleet services for professional outfitters. From custom features to fleet graphics, we'll work with you to deliver the ideal boats for your situation. Whether you need one boat or an entire fleet, outfitters can expect a quick response and great service from Achilles.

RS Series

RS-156

Designed for serious, recreational river-running as well as professional use, the Achilles RS Series offers many of the same outstanding features as our professional boats. The tough nylon core fabric of all RS Riverboats is coated with Hypalon®, and the fully-wrapped floors are a full 840 denier. A long list of standard features includes two fixed thwarts, multiple air chambers, frame wear patches (except RS110), numerous “D” rings, standard Achilles recessed military style valves and much more. Even with this, these rugged boats are light-weight enough for outfitters and private users to carry and transport with relative ease.

RV Standard Series

RV-140

Nothing has been left out in making Achilles RV Series riverboats the strongest available for professional use. Both the 840 denier tube fabric and the additional 840 denier fully-wrapped floors are coated with DuPont Hypalon® for unsurpassed protection against damage from abrasions, punctures and weathering. All “D” rings have been strengthened to last on all stress points and tie downs. Plus, you have the guarantee of famous Achilles quality and attention to detail on all the great standard features which make these boats ready for any professional use.

Leaffield valves are featured on all RV models.

RV-140SB

RV Self-Bailing Series

These rugged, self-bailing riverboats are built to handle any professional use. Available in both two and three-thwart designs, they offer all the features big water outfitters demand. Naturally they are made with sturdy, 80% Hypalon®-reinforced fabric and the unsurpassed construction offered only by Achilles.

Self-bailing system, fully wrapped, reinforced floors, lace-in thwarts, generous D-rings, frame wear patch... nothing has been overlooked in producing these “top-of-the-line” boats. Still, they are extremely lightweight for easy carrying and transporting. You won’t find a stronger, better-built riverboat ready to go to work for you.

KSB Series Kayak

KSB Kayaks deliver the most fun you’ll ever get out of white water. They are self-bailing and made with tough, Hypalon®-reinforced nylon fabric...just like our rugged riverboats. They also feature multiple air chambers plus inflatable floors and lace-in, adjustable thwarts make these boats ready for any professional use.

KSB-94

The reinforced outer floor is wrapped 50% for extra safety. Stable, maneuverable and forgiving, these tough kayaks are designed to handle challenging rapids, waves or holes.

Lightweight and compact enough to go anywhere, the KSB-94 and KSB-116 are an easy way to experience the excitement of whitewater rafting.

KSB-116
